Sir,

We have pleasure in offering you the following:—

MEDICAL DIARY. A Manuscript Diary kept by Dr. Asplin, an English Physician practising in Paris and Versailles, after the Restoration of Louis XVIII.

Written in a small and extremely clear hand, and extending from January, 1819, to December 1822.

Bound in 3 volumes, 8vo. calf.

An intensely interesting and well-kept diary, besides giving his daily professional Visits, Dr. Asplin has gone into details over many Surgical Operations. He also records the important news of the day.

We read that he was on terms of intimacy with the Duke of Kent, and records the Birth of his daughter Princess Victoria, the late Queen of England, he

by J. Asplin: $8\frac{1}{2} \times 5\frac{1}{2}$ in., xviii+496,
viii+480, and xiv+418 pages.

Diary of an unnamed English physician practising in Paris and Versailles, from 1 Jan., 1819, to 31 Dec., 1824, with pr. insertions (newspaper clippings—in one of which, at p. 218 of vol. iii, he is referred to as Dr. Asplin—and a list of members of an English 'Medical Book Society' in Paris, iii, p. 291b). There are a few brief notes on Paris clinics, and some descriptions of fêtes, fights, funerals, and executions (e.g. vol. i, p. 461, with sketch), but it is mainly a record of professional and social visits and of the weather.

References to his contemporaries at Edinburgh University identify the writer, a native of Waking in Essex, with the Jonas Asplin who graduated in 1797 with thesis 'De ictero' ('List', no. 5843). Among his friends in Paris were the well-known physician Franz Xaver Swediaur (or Schwediauer, 1748-1824), whose autopsy he reports (iii, p. 320); Caesar Colclough (c. 1753-1822), formerly chief justice of Prince Edward Island; and Sir Howard Douglas (1776-1861), governor of New Brunswick.

Blank pages occur at the end of each vol.; pp. 336-51 of vol. iii are misbound. Bought from Maggs Bros., 9 Feb., 1915.

Never buy it by the Voie, but by the Corde for there
are 2 Voies in a Corde, so that you lose a Quarter
of a Voie by the Voie, which is no legal measure,
and you pay for a Voie the same as for half a Corde.
Half a Voie is called a Steer.

The Corde measures 8 feet long, 4 high & 2 1/2 deep.

Vendredi

Le premier de Janvier

à Paris. Rue de Beaune N.º 7

The New Year is ushered in, under circumstances peculiarly favourable.

All Europe is at Peace and except some slight things with the Mahratta's in the East Indies; Asia also. - South America is just emancipating herself from the Spanish Yoke with every prospect of success while the Mother Country under a most Tyrannical Government and wotse King is going to the Devil.

The English Farmer is still labouring under considerable difficulties - with a pressure of Taxes & poor rates; & expenses which he cannot lessen. he has to encounter an unlimited importation of Foreign Corn free of duty, while the markets are any thing above 80 shillings per Quarter; although it is well known that under present circumstances, he cannot grow it himself under Five pounds. -

Jr

1849

2.

January.

The Question upon the Corn Laws seems to be but ill understood by the Legislature or indeed by any one -

There has just been a complete change in the Administration of this Country. And something very like it is on the tapis in my own.

The Duke of Wellington is just appointed Master General of the Ordnance, the second Military appointment in the Kingdom since the Earl of Mulgrave.

This day is a Holiday all through France. They call Vapon, or leave their Card with every friend or acquaintance they happen to knock.

Even the Tradesman leaves his card at his employers. -

A little of this Civility & attention would do no harm in any own Country and would tend to soften that harshness of manners so evident to every stranger that enters it. -

The day very foggy - Mr. Colclough calls. The families are all turning out in their best style - Some of their Carriages are fine & splendid & they are so numerous to day, as to make the streets very gay. -

walked to Popsy and found my little patient Louisa something better. - Remained there till night - home at 9^{1/2}. - very dark and a very thick Fog, but not cold - am still very unwell myself from a severe Cold. -

M^r. Colclough sent his Horse in for me at Eleven. - Rode to Popsy - foggy, but very fine & cleared after 12. -

Louisa much better, her Fever was at a Crisis last night (the 7th day.) - Walked with M^r. G and called upon M^r. Abbott before dinner - Captain Abbott called on M^r. G. - but did not see him - nor did he call at his Brothers - home at 9 - Night very fine and Moonlight - have still a cough & cold - Frozes - Wind E. -

Dimanche le 3^{me} -

Morning beautifully fine - M^r. Colclough came in and left his Horse for me to go out on - he walked to the reading room in Rue de la paix. Received a letter from Captain Colclough at Boulogne S. M. - The streets are very gay, not so much from the Carriages as the Pedestrians - they are all in their holiday clothes & it being a little frosty the

walking is very excellent - The Garden of the Tuileries is particularly crowded and is really splendid - for a Parisian wife dress fine, whatever other privations she may undergo. - and I believe the observation does not less attach to the other sex. - I mean when abroad, for at home they are the filthiest devils on earth. -

Found Louisa greatly better to day. - Took little Mary & called on Mrs. Abbott & family - Mr. A & his eldest children are in Paris - In the Evening Mr. Abbott called for me at 8 $\frac{1}{2}$ in his Carriage on his way to Paris and put me down in Place Louis Quinze - Night very fine and moonlight. - Freezes, as it has done slightly all day. -

Lundi le 4^m de Janvier 1819.

Very cold this morning - but frosty & fine.
D^r Swediaur called -

The Duke of Gloucester

who has been some days in Paris, dined ^{on} ~~last~~ ^{Saturday} ~~Monday~~ with the King. - Mr. Celslough called & is to meet me at Swediaur's - Have seen nothing of the Abbe Kearney for some time. - Called on D^r Swediaur at 2 $\frac{1}{2}$. Mr. G. came soon afterwards - Mons^{ie} the Spaniard came in also with his Daughter - Mr. G. being tired we took a Coach to the Barrier

The Young Queen of Spain died about the time of her expected Accouchement - The Caesarian Operation was performed and a living Child extracted, a girl which survived only a few minutes.

To the Hospice de l'Allaitement ou l'Hospice des Enfants trouvés.

Rue d'Enfer N.º 74., à l'ancienne maison de l'Oratoire. -

This is the neatest and one of the best institutions of the kind I have yet seen, for they extend through the Kingdom, and there is not a Town of any magnitude that has not a house of this kind for the reception of

Illegitimate Children

and indeed, I am told for Legitimate ones, in some instances, for it is not unusual where a person finds his family increasing too fast to send a Child or two to these institutions.

Children are received at all times, Night

and day. The name given with it, which is usually attached to its Arm is then registered and the Child given to a Nurse, who places it in the little Bed, which it is to occupy. These beds have the neatest appearance imaginable. they are of Iron, something like a cradle put upon legs. and in Summer, have very neat white furniture, in winter yellow. They are arranged in two rows on each side a very large room and have a very pretty appearance, sometimes on entering, the lovers of Music, may have every every note on the Gamut. — The Child is baptised immediately, on its admission, for sometimes they are not two hours old & if sick it is put in the Infirmary, where there are 50 beds in two or three separate rooms; and one particularly for diseases supposed Venereal — they have also vapour baths.

The Children in perfect health are placed out in the country with women & nurses who are inclined to take charge of them under the regulations prescribed.

There are about 280 beds in the House but the woman who went round with us says there are 16,000 children on the establishment.

They are kept till 12 Years of age & are then placed out to some situation or employment.

The number received annually is about 5,000. — There have been fifteen taken in to day.

The Sums paid with those placed out in

7 Francs during the First year.

From Seven to Twelve, the Nurse receives 48 Francs per Annum. —

The Child is furnished with all clothing by the establishment — jusqu'à l'âge de six ans révolus —

Children brought in about two years of age (probably deserted by their parents) are sent to the Hospice des Orphelins, ancienne Maison des Enfants trouvés. Faub. S^t. Antoine N^o. 124 et 126.

There are several Cases of deformity in the Infirmary, particularly, Stare Lep, with a deficiency of the Palate, these are very frightful, and the Nurses in the Country will not take them.

Nurses.

There are about 4000 Nurses employed in the Country.

There are 30 living in the House

This Institution was founded by

5th January.

With all this care & regard for these helpless little innocents, the mortality amongst them is inconceivable. They are certainly brought in very young, and many perhaps live only a few hours - but I am told from an authority I cannot doubt, that from an enquiry instituted about three years ago, without the object of it being known, that it appeared, only four in One Hundred arrive to maturity. a proportion almost incredible - and if so, is less than in China where they are allowed to destroy their children, by throwing them into a River or exposing them in the streets - And no doubt more children are saved by accident, and the casual compassion of Individuals, under their barbarous system (arising from an overgrown population) than under the humane and mysterious institution above described. —

Parisian Chastity.

I am told, the Births in Paris are annually about 22,000, of which there are not less than 9,000 which are illegitimate. —

And as the same system is most likely equally prevalent in the other large Towns of the Kingdom there is certainly much need of

Les Hospices des Enfants trouvés.

There are some regulations respecting the Brothers or their friends making enquiry after

1819

January. 5th their children, which have been differently repre-
sented to me, & which I have yet to learn -

From hence we walked by the Boulevards
to one of their New Slaughter Houses or
Abattoirs.

These are all placed near the extremity
of the City, the one we examined was that of
Dauguierd

All the Cattle are slaughtered in these
Buildings, where there is every convenience for
the purpose. - All the large Butchers have
places exclusively to themselves, and a certain
sum per head is paid for all animals killed
there, & from what I can learn, the produce
must be very considerable - That of
Montmartre

is the largest, but they are all upon the
same plan & are excellently arranged. - The
Cattle of this country are so used to be led
about, that the largest beast, are knocked
down by the man standing in front of him
and two others holding his horns only. - he
uses a large hammer & strikes the first blow
between the Horns, & then on the forehead when
down, as in England. - Their Calves & Sheep,
they kill, by nearly severing their heads
from the body. - There are excellent stables

1819

for the Cattle to be killed, and pens for sheep - all under cover & kept very clean - there are places for Hay above, and Buildings for drying the Fat, which is sent out in little tubs.

The Corporation of London and all large Towns would do well to take a pattern from these Examples. —

To Passy. — after dining with Mr. Colclough went to Mr. Abbotts in the Evening — very hard frost & at 10 as thick a fog as I have seen — though moonlight, they were lighting all the lamps in my way to Paris. —

— Mercredi le 10. — Epiphany.

Hard Frost — very fine. — Mr. Colclough walked in from Passy. — Went with him to Galignani's for the address of a Man servant who advertised in his Paper. — found the place, N^o 28 Rue Feytaud where we went and left word for him to go to Passy tomorrow morning — we then walked out to Passy — very dirty in the Streets of Paris, but out of them a fine hard frost and clear sky. — Dined with Mr. Abbott N^o 62 Rue Grande — Beautiful moon light night and clear as day. —

2. Jeudi le 11.

I understand the French families give principally fairs for their entertainments yesterday

1819

11

8. January. and in consequence they have been for a few days, nearly or quite doubled their ordinary price. Mr. Hartman bought one for Mr. Colclough yesterday. I was obliged to give 50 sous for one she could have bought at any other time for 25 or 30.

Frost continues - morning very fine.

Mr. Abbott called - spoke to me respecting my attending Mr. A. in her accouchement.

He walked with me - I called upon Mr. Lloyd & Mr. Saunders. - then upon Mr. Hartman - met Mr. Colclough in our way to Rue Servandoni, going to Mr. Loyds.

Went to the General Post Office & enquired for a letter for Captain Colclough at Bordeaux.

We then called upon Mr. Capt. Abbott, whom we saw with Miss Staunton. - In our way to Passy saw Capt. A. - enquired at the Hotel Virginie in Rue S. Honoré for Mrs. Staunton, but could not hear any thing of her. - To Passy. - Streets of Paris very dirty - Country not so.

Dined at Mr. Colcloughs. - Rained hard in the Evening - home at 10 & it rained a little all the way - very bad walking.

9. - 8. -

Morning fine. - Mr. Colclough sent in Prosper. Day very fine & Sunshine. - At 4 O'clock

walked to Passy, and dined - Louisa quite recovered. - home at 9. - fine moonlight night, but dirty walking. -

N. Larvior 9. -

Dull morning. Mr. Colclough came in on horseback - Blos fresh from S. & SW. with slight shower.

Called at the Abbé Kearneys lodgings N. 8 Rue de Francs Bourgeoises. près la place St. Michel. - from there to Passy, rained hard at times, and miserably dirty walking by the Hospital des Invalides to the Champ de Mars. - must not attempt the road of Rue Universite again in wet weather. - Rained & blew very hard in the Evening - found my patient down stairs - home at 9. - has just rained hard but continued fair till I reached Paris. -

The walking is very bad. -

©. — 10

Fine morning, but very dirty. To Passy at 4. dined with Mr. C. - Mrs. Hartman & three of her daug^r waded through the mud & called upon Mr. Colclough today. - went to Mr. Allet in the Evening and stayed till Ten. - very fine moonlight night -

Mr. Colclough came in - declined going out to day - having some writing I went to

Sat. 11. finish - Young Saunders called - engaged to take Tea with his mother & Mr. Lloyd in the Evening. - Called on Dr. Swediaur and sat some time. - Day very fine but streets miserably dirty. - Took Tea with Mr. Lloyd, Mr. & Miss Saunders. - Home at 10. -

S. - 12

Dr. Colclough called - Mr. Abbott also at 2. in his Carriage with two of his Children - rode with him to Popsy, and walked in the Bois de Boulogne where we saw the Duchesse d'Angoulême, who was taking a walk having left her attendants at the top. - Received a polite bow from her - She is in mourning - I suppose for the Queen of Spain. Day most beautifully fine - The Duchess had her Carriage fix white horses & Guard.

Took a Game at Chess with Mr. Abbott, - Mr. Colclough called - with whom I dined & went home at 9. - Fine Moonlight night.

S. - 13

Dr. Colclough sent in to say Mr. C. was unwell to day. - Called on Dr. Swediaur & found them ill. the Spaniards sat till 3 1/2 and then walked out to Popsy

where I found a note from Lady Barrington to say Sir Jonah was ill and requesting my attendance. — after dinner took Mr. Colclough's Horse and rode to Boulogne — the moon rose at half after 6. — Took Tea with Lady B and her daughters — remained till 9. — called and set a little with Mr. Colclough — home at 10. — beautiful night and very mild. —

24 — 14.

Morning fine. — walked to Sir J. Barrington at 9. — Found him very ill — returned in the carriage with Lady B. to pesty. — she went on to Paris — came on to pain — remained with Mr. Colclough till 4 when Lady B. called for me. — to Boulogne and dined — called at Mr. Co's in my way home at 9 1/2. — very dirty and dull night, but no pain at present. —

An important Cause has just been decided before the in a case of an arrest for a debt incurred out of this Kingdom.

 as Apothecaries in England are mere Herborists
 & sellers of a few Simples, but know not
 how to compound the most trifling prescrip-
 tion, or even to read it. —

Venice

Venice, on approaching it - appears to be rising out of the Sea - it is built on logs of Logwood - is entirely intersected by Canals upon which you go from place to place in Gondolas as in Hackney Coaches, and almost every family had one of their own - The great Church is beautiful - the houses are very near each other, & there is only a small space to walk on by the side of the Canals. - Bonaparte caused one of the canals to be arched over & it makes the only promenade in Venice. - he also by the same means, caused a Garden & public walk to be made. -

 to the above observation, for you travel through
 a beautiful country, amidst numerous carriages

 the country about it is beautiful on every

with an account of the Shipwreck of the Alceste
in the Straits of Gaspar. on the 18 Feb. 1817.

By John M. Lud. Surg. of the Alceste.
1817.

This work contains the account of the attack
made by the ship in forcing her passage up the
Bocca Tigris or Bogue, to Canton - the Viceroy
of Canton refusing or neglecting willfully to send
a pass. - The ship was attacked by the forts,
one a battery of 40 Guns, & altogether 110 pieces of
Cannon on three forts within half gun shot of
each other with a garrison at that time of about
1,200, Men. -

The batteries commenced a warm, but
idle direct fire - At last, when abreast of the largest
battery and within pistol shot of the angle of it.

and just before they could get all their guns to bear into the ship, a whole broadside, with cool aim was poured in amongst them, the two-and-thirty pounders rattling the stones about their ears in fine style, & giving them at the same time three roaring cheers.

This salvo was decisive, at this particular point; their lights disappeared in a twinkling and they were completely silenced: but from the island opposite they continued their fire, the balls of which passed over & around us, striking New Annanahoy, which had the full benefit of their own as well as our shot. —

Soon after this our point was gained, and standing up the river, we displayed our stern to these gentlemen —

Almost any European gunners, with the same advantages would have blown the Frigate out of water. —

The Island of Paulo Leat near which the ship was wrecked, with Lord Amherst on board returning from his unsuccessful Embassy to China — is about 5 miles long & 3 broad & about $2\frac{1}{2}$ degrees from the Equator and is in the line of Islands between Bornea and Borneo. — The soil is capable of af-

A Gross & Shameful Imposition

The Consul
and
Passports
at
Calais.

I am informed and from an Authority I cannot doubt - That a levy of three shillings per head upon all persons coming in or going out of France by Calais & to be taken by Mr. Fontaine the British Consul there, that is

Ferrier & Co. the passports are to be visited by him, on their exit for entry for which he is to be allowed to make the above charge -

This of itself would not be thought much of but its infamy arises from the nature of the transaction which is said to have given rise to it. - and which is not less abominable than suspected -

The Consul there has long conceived and very properly so under the Act of Parliament that he has a claim of ten shillings upon every packet vessel coming into the Harbour - And to assert this right he has lately had recourse to a Court of Law where things were turning in his favour, when he receives an intimation from my Lord Castlereagh that he must stop the prosecution - This leads to a conference when it turns out, that the owner of these boats, or at least the principal one of what are called the bye boats, for I believe they are in a Company, has a considerable influence in the Foreign ports - so much so that my delicate tender Lord is afraid to interfere with his interests, that is he is a sort of *hôte* one teneur - He then says to Mr Lomblane the Consul - let these boats alone, and you shall have a view of all passports at three shillings per

per head which will pay you much better - The Consul could not be otherwise than satisfied with this arrangement which will be a little fortune to him and which poor John Bull is obliged to swallow under the pretence of reason, that the measure is ^{indeed} necessary from many improper persons finding their way backwards and forwards with impunity. --

I should only hope that the French Authorities will not be so weak as to second such a measure. —

by whom it was founded - The Institution is
 Institution in Faubourg St. Jacques near the Luxembourg

L'Abbé
 Sicard

The Abbé explained the principles upon which
 his system is founded. - and showed us the
 manner in which he begins his instruction,
 with a boy who came in only this morning -

Figures of the different objects most familiar
 as a Book, a sword, a Sabre, a Drill - a
 boat. a Cannon - a Mortar & its shell - a
 coat, a knife - a Key - a Chain &c were drawn
 by some of the pupils with Chalk upon a large
 black board, where they exhibit - The pupil by
 his motions and gestures, sufficiently testifies
 his knowledge of what these represent - The
 respective names, as livre, l'Épée - Sabre -
 Moulin à vent - Battica, cotica - Claf - Boite
 Canon - Mortier - Bombe - Chaise &c are then
 written upon the respective objects, and the
 figures pulled out - The pupil, who has most
 attentively observed them, then shews by similar
 signs, that he perfectly understands what the
 word, indicates by being shewn them one after
 another. - Nouns are defined - and the Verb
 is first simply shewn by the present of the Indicative

and then its root, which is demanded by particular signs, at which they are particularly alert - These are principally with their fingers, motions of the hand & arm. - They seem to carry on a quick conversation with each other & any observation is immediately conveyed. - and their answer to many questions given in writing by the audience is quick, true and correct. - I have seldom been better pleased with a morning's recreation - and the Abbi Secard, usually has been equally so at the numerous & respectable audience who witnessed his examinations. -

The pupils in describing him always add the man with the head inclined (tête inclinée) from his head being constantly a little so. -

Several persons left the room very impudently during the lessons. and some of my countrymen among the number - it not only disturbs the audience, but is no great compliment to the Abbi himself - He very mildly observed upon it - that he could not conceive the reason for their so doing - but added - "in a heap of corn the lighter parts will fly away while the good will remain behind." -

They receive about 120 Children from 12 to 16. -

There were only two Girls - He observed, it was not so common for women to be dumb. -

I have noticed before, that D^r S. was very
 near losing his head during the Revolution,

 it by the order "to put all foreigners in

 after twelve o'clock to the President &

 bench immediately before him - they knew
 each other very well. - Robespierre made
 a motion to have some statues which were
 in the Hall removed - One was a bust of Robespierre -

there were three of them - the first was ordered to be removed & was "downed" with "immediately". He then moved for the letter, to the second which was a bust of Helvetius - Swediaur could not stand this, and in his ardour for Philosophy exclaimed, that if the Assembly did not respect a philosopher, they would invite the indignation of all Europe against them.

Robespierre turned round to him, and some others behind him declared for equality in all things. Swediaur said he did not care for any of them & endeavoured to save Helvetius, - he was overpowered however & down came the Statue! - Robespierre never forgot this, & when in power, issued the order to seize all strangers (foreigners) in the section in which Swediaur lived - well knowing there was only himself living in that section. -

The Order came from the Committee of Public Safety - to the president of the section which he was bound to execute, but coming after twelve o'clock at night, it was usual to defer it till next day & the president and the four members, all knew Swediaur and that he was the only foreigner there - and therefore avoided enforcing it - for had he been put in prison, he must have suffered. - He afterwards died young. -

This Ambassador was to have been
presented a short time since, but it seems
a point of etiquette with the Persians that
their Ambassador should be received by the
Sovereign to whom he is presented standing

This however Louis from the state of his
health found it impossible to do. - and the
Ambassador proposed that if the King could
only receive him sitting, that he should
sit also - to this however the King would
not consent so that the Ambassador who

 a short corner of the yard to pass from the
 bottom of the stairs to the gateway which led
 into the street, I expected nothing less than
 a shower of bricks or some such material
 upon us from the windows - for the place is
 under a repair - nothing of this kind, I sup-
 pose could be found, for I heard him com-
 ing down in immense haste storming all
 the way, and found he had armed himself
 with a short boot-jack - he immediately
 made at me with this, but being completely
 on my guard, I avoided the blow, and re-
 turned him such a one on the side of his
 jaw, ^{with my walking stick} as immediately to make him throw
 down the boot-jack, and to seize a large
 brick broom with an immense handle -
 this he drew out and it being very large
 about four feet long and very sharp at the
 point, he had now a most formidable
 weapon - I should have closed in upon the
 fellow, but knowing that if once down,

case here, would instead of protecting the weakest
 however unequal the combat, fall upon him &
 add to the blows of his antagonist - If my object
 being to protect Dr. Saunders to her Hotel a
 little down the street on the opposite side, I
 acted only on the defensive, and was fortunate
 in parrying several blows aimed at me which
 would have broken any bone they might have
 alighted upon. - My stick with which I defended
 myself now broke, but the fellow at the same
 finding he could not hit me, attempted the
 charge with the very sharp point of his weapon
 my half stick however served me very well
 in parrying his thrusts while retreating in
 the street and I reached the Hotel de Bourbon
 without receiving any material injury in
 my person. One thrust pierced a little my
 right hip - and one ran through my coat
 on the left. both which I believe would
 have been very serious had I not been
 fortunate enough to diminish their force by
 my activity and parrying - I have never
 before had to avail myself of my skill in
 the sword exercise, and I vividly believe I
 now owe my life to it only. - for no
 Frenchman would have interfered unless I had been

down, and then only to assist the blackguard
in knocking my brains out. — of which
I was fully aware. —

My business now was to the Police, for
I was very certain the fellow would endeavour
to make his story good there, before I could
make a complaint. — Accordingly the landlord
of the Hotel de Bourbon, a well behaved obliging
man, and the porter who assisted Mrs. Saunders
in removing her things, also a very civil &
well behaved fellow, accompanied me to the
Rue de Bac to the Commissaire de Police.

It is a serious thing in this Country
to draw blood — the fellow was covered with
it — he told his tale, but he had taken care
to pass with his hedge stakes which would
have been too powerful evidence against
him — he made out so lame a tale that
without asking me a question the Commiss
aire dismissed his complaint and from the
representation given by my witnesses, de-
clared that he not seemed to have been
sufficiently punished he would now commit
him to prison — Fortunately for me the
Landlord of the Hotel Bourbon, with whom
this fellow once lived as a porter, gave
evidence to the evidence of his temper and

Hotel Dieu

To the Hotel Dieu - Saw the Dissection of the Man who died on Wednesday after being operated upon for Aneurism - Hemorrhage took place on the fourth day - pressure was used and Dr. Subelavian Garzen of the Arm came on. - The right Subelavian Artery was secured on Tuesday

the 30th March. - the Artery appears as if cut, the Nerve was included in the second ligature. - There was an immense mass of Coagulated blood in the Aneurism.

The operation does not seem to have been well done. -

Home to Breakfast at 11. - fine day.

Dr Colclough called. - This is the last day of the

Procession to Longchamps.

Took my walk through the Tuileries Gardens to the Champ d'Élysee to see the string of Carriages in their very best and which may be seen equally good every day in almost every street in London. - Beyond the Barrière de Neuilly the dust was intolerable - went by the end of the road in the Bois de Boulogne called Longchamps and was quite satisfied.

The wind is N. and going down you are clear of dust, but the Carriages coming up on the other side, are smothered - no carriage can pass another so that if you

once enter the stream you must go with it.
The day is beautifully fine - Stroked on to
Pappy. - Mr. C. and Louisa were in Paris &
just returned - Mr. C. is very poorly - Met Mr.

Voltaire. and returned - Called on Mr. King
but did not see him - Also at Mr. Concanmont
who was also out. - To Pappy - looked at
a small house in Rue Bas which I should
like very much. - Dr. Abbott came in to Mr.
Cicelough. - Home at 9. - very fine & even
hot day - The Cresset trees are showing
their bloom. - Returned by the Champs de
Mars. - There is a swamp there in which
besides the noise of the Frogs, there is a distant
sound from various places, like the little bells
hung under the horses' chins in this country.

1819

Avril le 10.

But the sound is more distinct, clear and harmonious - it proceeded from some large stones squared for building - as well as from about the small latter. - I could not make it out. - When passing once before with Mr. Saunders we heard the same, but more numerous - and he thought it proceeded from the bells of Horses in the road on the other side of the Seine. -

-erable on the great road - it is quite in clouds
The ride about Meudon and to Ispy is truly
beautiful - went through Valquard and

storm came on and raised the heaviest
clouds of dust I ever witnessed - This was
soon allayed by the shower and I reached

the Hunt, but could not get a view of the Stag. The Hounds are English ones, given by the Regent and there are about 40 couple of strong dogs. —

The Stag has not fair play — for men are stationed in different parts with five or six couple of Dogs to let loose occasionally, when he makes near where they are. The Huntsmen have a dagger or short sword and a whip, suspended from a Girdle — and the Huntsmen ride in Sack-bots. — The attendants are very numerous and many have the French Horn and there were even the Dragoons accompanying the Chace. —

right, in consequence of which Webb was
called upon by Parnsden, but refused to
meet him, in consequence as he alleged
of his having refused Mr. Isaac — Parnsden

therefore did not entirely close the valve.
One of her feathers only was scorched, which
sanctions this supposition, for her light
gauze dress was untouched and she had
several fire works in the Car with her.

to ripen them. — the Vines are now too forward to
take any hurt from the wet. — Wind high.

Cherreuse - it is on the road from Versailles
by Guyencourt to Cherreuse. - by the Rue Satory
I however rode by Buc which brings you to
the same point. - Guyencourt is just off the
road to the right and I suppose about 4 miles
from Versailles - it seems a fine corn country
about it and the country literally swarmed
with people turning the grain, after the late
heavy rains. - after passing ^{a small village} *Voisins, about a
*Voisins. ^{le} mile & a half further the ground is not so
*Voisins. ^{le} good. - Port Royal is by the road side about
4 miles from *Voisins - You see a large house
(a farm) on the right called la Grange,
which I have no doubt formerly belonged to it -
Grange is the French for a barn &
Grangier, a Farmer -

it is most probable therefore that this was the
principal farm or deposit of grain, attached to
the Convent. - for in many parts of England
some farms are called The Grange and no
doubt these were formerly belonging to some
monastery near them.

I went up the road leading to the Grange
and round the buildings, but I found

1819

le 7^{me} d'Avr.

the road only led one into the woods 577
 which are cut for the purpose of hunting &
 I suppose belong to the King - Though I
 was close to this spot, I had great difficulty
 in learning which was Port Royal - Then
 it a pretty valley close by, & I understood it
 was there, but any one going from Versailles
 would miss it, for though by the road side
 it is quite shaded from it by Trees. -

Returned to the great road and descended
 the Valley - saw a building through the
 Trees and an appearance of water, but
 no regular road to it - Passed on, and
 leaving the road took a foot path back
 to examine that part of the valley hid
 by the trees, which grow upon almost a
 precipice. - I here saw the ruins of an
 old wall enclosing a large tract of ground
 & meeting a man, he told me this was

Port Royal

There is scarcely a vestige of the Convent.
 rode on towards Chevreuse - ascended the
 other side of the Valley which winds towards
 the left, & came to a country, much the
 same as that I have passed - finding

Chvreuse lay more to the left, in another Valley - & apparently off the great road, & understanding it to be only a small place, I turned back to examine the site of Port Royal. - and rode over every part of it. -

The walls bounding the former inclosure of 5 or 6 Acres are in complete ruins - it is altogether a low swampy place - there is here and there some remains of the former buildings but nothing to give the least idea of what it might have been - 'a large pigeon house like a Tower is standing & in good repair, & the mill which is supplied by water headed for the purpose, is all that remains, and is now a farm the Mill Dam, & the course conducting the water to the little mill, for the building is a very small one, are as formerly, but the buildings appear to have been erected with the materials. - so that there scarcely remains a vestige of a place, - famous in the annals of literature, & which gave birth to many learned works, which were printed by the Mesprieux of the Port Royal, and where some of the most learned men of the age

1819

about the 7th.

received their Education - ~~and~~ ^{and} ~~published~~ ^{published} their works there. -

179

Returned home by the Blue Satory, -
which is the nearest - Took Tea at Mr.
Colcloughs. - Evening very fine. -

8.

Beautifully fine - ^{Mr. Scully called.} intended going to Church
but was sent for to ^{Mr. Colclough called.} Mr. Gardiner. -
Met Mr. G. in my way there who returned
with me. -

To the reading room. - Called upon Mr.
Saunders. - engaged to walk with them
in the Evening. - Dined at Mr. Colcloughs -
Walked with Mr. & Miss Saunders to
Viroflay - it is a sort of fetu there and
the dancing was very pretty - The trees
were tastefully lighted & the music excellent.

The contrast between these meetings &
what would be case with similar classes
in England, must strike every one. -

In England, with such an assemblage
there would be noise, brawling & confusion
here you hear no more noise than would

be occasioned by the assembly of a few people in a room. - the greatest regularity is observed in the dancing - no coarse or low conversation and the greatest possible politeness - If in any thing we want a lesson from our neighbours it is in this civility of the lower class of the people. - There were to be fire-works at 9^{1/2} but they appeared to be insignificant ones & we did not stop to see them. - The moon was rising when we came away, which with the lamps shining through the trees, & the sound of more than one band of music, form a scene truly interesting and agreeable. -

Took tea at Mr. Lloyd's at 10. - on returning home found Cap^t. Wyatt had called. -

D. 9th de'c. 1819. -

Was called up at 3 to Mr^s. Townly N^o. 30 Avenue de St. Cloud - a Midwifery case & home again by six. - at 10^{1/2} Visited Cap^t. Wyatt. - Called upon Mr^s. O'Neily. - To the reading room - saw Cap. Yellan there. Visited Mr^s. Powell. - And Mr^s. Townly then Mr. Molynneux. -

 Walters returned in time to the Marché —
 found Capt. Mackenzie & Mr. Gunning there.
 The Criminal was brought in a Cart
 attended by a priest — which drove to the
 steps of the Scaffold. — The man mounted
 his Sack which was the only upper co-
 vering he had, was then taken off, he
 was secured to the board which falls
 with him down under the Guillotine —
 his hands were tied behind him before
 he came. — he seemed indifferent to the
 fate he was going to suffer, but when
 fixing the board which secures the neck
 he struggled and made much noise as
 if they hurt him in fixing it — The knife
 fell — all was quiet — I saw his head fall
 into the trough affixed to the machine — &
 his body was instantly rolled into a long
 basket made like a box & painted red as
 was all the woodwork of the machine. —

The feet going in first, the shoulders
 lodged on the side of the Basket & the
 blood was spurting from the arteries
 about six inches. — The head was
 flung into the basket with the body &
 the basket then run into the Cart which
 took it back again to the Prison. —

Samedi

Janvier premier

à Versailles. Rue de Vergennes N. 17.

The weather is very cold and the frost is set in with every appearance of a hard winter. —

Some strong measures have been taken by the British Government to prevent Sedition and Blasphemy, by passing bills, which by many are thought to tread much on the Liberty of the Subject, but which appear to be absolutely necessary for the peace & safety of the Community. —

The English Farmer is still unprotected by the Legislature and distress is prevalent throughout the Kingdom — The Merchants begin to find that their markets are more deficient upon the state of the Agriculturist than they have ever been willing to allow. —

Visited Mr Molynaux. - The French seldomough show their horses, & the consequence is they are falling to by in every direction - it is excessively slippery & the snow is falling fast. - Much against my inclination am obliged to go to Paris to day to visit a patient with the almost certainty of not being paid for it - Am engaged also to dine with Count Pelletier -

Cabriolet

My purchase of yesterday (a Cabriolet & Harness) arrived this morning from Paris. - The Horse belonging to it which brought it here, is sold for 100 francs to a French General, & to be delivered tomorrow morning. -

Took my place in a Parisienne for Paris & called at the Count's to excuse me in case I should not return to dinner - for the travelling to day is tedious. -

Got into the Voiture at 1. Visited Mrs. Whitham in Rue Verneuil - and was time enough for a Gondole at 3 from Paris. - and found Mr. Asplein at the Count's waiting for me - The Count was called to Paris on some business after I saw him, & we dined with the Countess & her family only. -

Freezes very hard. - the snow is not deep. -

Returning home at night or rather morning we had the benefit of a full band of music, in the Rue Montbaron. -

LONDON, JANUARY 22.

DEATH OF H. R. H. THE DUKE OF KENT.

The bulletins which we last inserted left little reason to hope that his Royal Highness could recover, especially as the copious bleedings which he had undergone had produced no effect in mitigating the severity of the disease. The following is a copy of the dispatch which we received this morning from Sidmouth:—

Sidmouth, Jan. 23, half-past one o'clock, p. m.

It is with the deepest regret we announce the death of his Royal Highness the Duke of Kent, which event took place at ten o'clock this morning. We have only time to add the following bulletin, and that Maj.-Gen. Moore is going off express, with the dispatches, for the Prince Regent:—

Sidmouth, Jan. 23.

We have great satisfaction in being able to announce, that notwithstanding the most unmitigated attention to his late R. H. the Duke of Kent, during the whole course of his illness, her Royal Highness is as well as we could possibly have expected, after so great a degree of anxiety and exertion.

(Signed) "J. WILSON, M. D."

"W. G. MATON, M. D."

We subjoin also the bulletins which were issued in the course of Friday:—

Bulletins.—Received yesterday.

"Sidmouth, Jan. 21, 1820—9, A. M.

"H. R. H. the Duke of Kent continues much the same as he was yesterday.

(Signed) "J. WILSON, M. D."

"W. G. MATON, M. D."

"Eight o'clock, P. M."

"H. R. H. the Duke of Kent passed the day rather more favourably than yesterday."

(Signed as above.)

Prince Leopold, Capt. Conroy, and General Batherhall and Moore, were present to afford consolation and support to the Duchess, the awful and trying event. The Royal Duke bore his affliction and illness with the greatest composure and resignation.

The melancholy event was brought to town this morning by Gen. Moore, who arrived in London at half-past eight o'clock, and drove to Carlton-house in a chaise and four. Carlton-house was soon after closed, as a token of respect to the demise of the Regent's Brother. Gen. Moore then proceeded to York House and Clarence House, to communicate the death of their beloved Brother to the Dukes of York and Clarence, and the Duchess of Clarence. The Gen. soon after proceeded to Windsor, to communicate the dismal tidings to the Princesses.

The complaint which has thus so suddenly terminated the life of his Royal Highness, was inflammation of the lungs, with cough, attributed, we understand, to a neglected cold, which he caught from sitting in wet boots after a walk in the environs of Sidmouth, with Capt. Conroy. In the morning of Thursday last, his Royal Highness was reported to be in imminent danger; but towards the middle of the day he rallied again in consequence of a little refreshing sleep which he had been enabled to obtain. Towards evening, however, all the alarming symptoms returned again with increased vehemence, and continued so till towards Saturday morning, when a kindly resolution of them took place. This, however, proved to be only that fatal relief which so commonly occurs before death ensues.

The situation of his amiable and afflicted Duchess will excite the sympathy of every heart. She was indefatigable in her attentions upon her departed Consort, and performed all the offices of his sick bed, with the most tender and affectionate anxiety. She did not even take off her clothes for five successive nights, and all medicines were administered by her own hands. These mournful duties, though they could not snatch their object from the grave, must at least have smoothed the passage to it; and the recollection of them will be among the strongest consolations of her widowed heart, when the lenient hand of time shall have soothed the keener pangs of sorrow.

His Royal Highness was the fourth son of his Majesty, and was born on the 2d of Nov. 1767. He was consequently in the fifty-third year of his age. He was a Field Marshal in the British Army, and had held the situation since 1801, of Governor in Chief of Gibraltar. He was also Colonel of the Royal Scots Regiment of Foot. His Royal Highness had seen much military service, and served under Sir C. Grey, in the West Indies, in the early part of the revolutionary war; during which time he was present at the reduction of St. Lucie.

He was married, on the 29th of May, 1818, at Coburg (and re-married at Kew Palace, on the 11th July, same year), to her Serene Highness Victoria Maria Antonia, youngest daughter of the late reigning Duke of Saxe-Coburg, widow of his late Serene Highness the Prince of Leiningen, and sister of his Royal Highness the Prince of Saxe Coburg, the chosen husband of our much lamented Princess Charlotte. The only issue of this marriage was a daughter, named Alexandrina Victoria, who was born at Kensington Palace on the 24th of May, 1819.

It would be superfluous to expatiate upon the many private virtues of the illustrious deceased, or upon the benevolent zeal with which he exerted himself in the promotion of every charitable object. They are fresh in the recollection of the public, and the regret which will be felt by all those numerous societies which enjoyed his protection and aid, may easily be imagined. Nor was his Royal Highness less endeared to his family and friends.—The political consequences of his death, looking to the probable succession of his daughter, who will of course cut off the descent to her uncles, we shall not now dwell upon.

"Whitehall, Jan. 24.

"MY LORD—It is with very great concern that I acquaint your Lordship with the death of his Royal Highness the Duke of Kent, which melancholy event happened on the 23d, at Sidmouth, after a few days' illness, to the great grief of the Royal family.

"I have to request your Lordship will give directions usual on such occasions, for the tolling of the great bell of St. Paul's Cathedral.

(Signed) "SIDMOUTH.

"To the Right Hon. the Lord Mayor."

We have authority from the Lord Chamberlain's Office to state, that the Theatres will only be shut this evening and the night of the Royal funeral, in consequence of his Royal Highness dying so great a distance from town, and the length of time that will elapse before the funeral. The Mourning will commence on Thursday next, for one month, and two weeks for the charge, according to the regulations which were established some time ago, with a view to prevent that injury to trade which had been experienced from more protracted Court Mournings.

The settlement at the Stock Exchange on Tuesday last produced a trial of strength between both parties, and stratagems were freely resorted to, with the view of deceiving each other concerning the real state of the market; among these were fictitious sales, and purchases to a large extent, the money having been lent in some instances for the purpose, in order to conceal the real operator. The speculators for a rise have hitherto been completely triumphant; the funds, slight reverses excepted, having continued buoyant, and progressively improving the whole week. The abundance of money, and the difficulty of employing it, which are, if possible, greater than ever, give great advantage to their transactions. Exchequer-bills, which have been lately at a discount of 10s., are now at a premium of 4s. This abundance was obvious, too, in the eighth payment on the last loan, which was paid on Friday without producing the smallest impression. Three defaulters have been declared at the Stock Exchange, on transactions during the last account, but they are persons of inferior consideration. The Committee have lately passed some new law on the subject of defaulters, which will tend greatly to increase the difficulty of re-admission, after an exposure of that nature. The highest price of the week in Consols for the account was on Saturday morning at the opening of the market, when the quotation was 68 7/8; but some unusually heavy sales of stock for money, and for Wednesday, which is the first open transfer day, taking place, a subsequent decline of 3/8 per cent. occurred, and the transactions of the day closed at 68 1/2; and though not so low as on Wednesday, the market left off extremely heavy. Part of this depression, however, may be ascribed to no transfer being made on Saturday, which, as the abundance of money is not then in full operation, is generally selected by the speculators for a fall, when they seek to make an impression on the funds Englishman.

STOCK EXCHANGE, ONE O'CLOCK.—The public seem still to hold to their opinion as to the probability of a Funding of Exchequer Bills, for the Navy 5 per Cents. were this morning done at 1 1/2 per cent. lower for the Feb. Account than they were for money; yet we hardly think this will be the case, considering the present state of money, which continues a drug, as it evidently must be a great sacrifice to Fund at 5 per cent. under the present circumstances.—Consols for Account were 69 7/8 on Saturday afternoon, some say buyers: but the market received a check, owing to some heavy sales, which brought them down to 69 7/8; they closed at 69 1/2. This morning they opened at 69 1/4, and have continued so during the early part of the day, with very little variations; they are now about 69 1/8, rather sellers, the market looking extremely heavy.—Star.

A late military promotion must give the most lively satisfaction to every Officer who has fought the battles of his Country, since from the boasted impartiality of the Commander in Chief, no refusal can be given to the fair and just claims of meritorious individuals, after it has been seen in the London Gazette, that a young man who was but a Lieutenant a few months ago, and who never saw a shot fired, except at pheasants and partridges, has been promoted to a majority without purchase! The circumstances of his being the son of a Duke

who influences the return of several Members of Parliament, and secures their votes to Government on all occasions, cannot be a motive for departing from the rules of office—otherwise the argument for a Reform in the Representation, requires additional force, as a means of preventing an abuse of Patronage so flagrant and so injurious to the service.—*Chronicle.*

The *Morning Chronicle* of to-day appears to have indulged itself in an attack upon the recent promotion of the Marquis of Worcester, to the Brevet rank of Major in the army.—It would have been but judicious in the Editor, even for his own sake, to have made inquiries into the circumstances of this promotion, before he hazarded assertions which are totally false and only calculated to create an erroneous and mischievous impression upon the minds of the public and of the army.—Had these inquiries been made, the Editor would have found, that instead of never having seen a shot fired but at "pheasants or partridges," this young Nobleman had served in many of the Peninsular battles under the Duke of Wellington. That he held the situation of Aid-de-Camp to his Grace; and as such, brought home the dispatches announcing one of the splendid victories which have raised that great Commander to his well-deserved and distinguished pre-eminence.—He would have found, that all the Officers who have been bearers of such dispatches from his Grace, have attained Brevet rank, whencethey became eligible to that promotion: and that in acceding to the urgent recommendation of the Duke of Wellington, that the Marquis should now have the promotion, for which his rank at the time did not give him a claim, nothing more has been done than to place that Officer on a footing with others, who have served about his Grace in the same capacity.—*Courier.*

One of the letters received this morning from Spain, and which we have seen, states, that 10,000 men were marching towards Cadiz, but the Governor being made acquainted with their approach, had ordered the bridge to be blown up, to prevent their entrance, which was immediately carried into effect.—*Courier*

THE KING.—His Majesty, we lament, is said to be in an alarming state. The following is extracted from the *Windsor Express*:—"The Duke of York arrived on Saturday at Windsor, and slept at the Castle. It is with the deepest regret that we state our apprehensions (but which are founded only on rumours which may arise from the continued attendance of the Duke of York on his venerable father, that his Majesty is again seriously indisposed). It is more than probable that the severe weather may have produced alarming effects on a constitution which must be gradually yielding to the infirmities of a great age."—Yesterday, about three o'clock, an express was sent off by an orderly dragoon from town to the Duke of York at Oatlands, to require the Royal Duke's attendance in London; however his Royal Highness arrived soon after, and attended the Prince Regent, at Carlton-house.—*Courier*

STATE OF IRELAND.

(From the *Dublin Evening Post*, Jan. 18.)

It is with deep regret we have to lay before our readers a record of outrages, crimes, and murders, committed in various parts of the Island—in the North and South, together with an account of the tumultuary spirit which appears to prevail in the midland counties.

A murder has been committed in Monterlony, county of Tyrone—another in the county of Derry, and a third at Castlereagh, county of Down. Several robberies have also occurred, but we do not care to anticipate the horror and disgust with which the reader cannot fail to peruse the particulars, which we subjoin.

We insert also a set of Resolutions passed at Parsonstown, King's County, the Earl of Rosse in the Chair, by which it appears, that the condition of that part of the kingdom is far from tranquil.

In the counties of Tipperary and Kilkenny, gangs seem to be organised, and a set of ruffians have attempted to rob the mail-coach, in which they were foiled by the gallantry of the guard.

We have no accounts this day from the West of Ireland, though we had reason to expect some—we are, therefore, unable to add any particulars to the brief notice published on Tuesday, relative to the atrocious mid-day murder of Mr. B. O'Connell, an event, resembling the catastrophe of the late Mr. Baker, of Tipperary, and which has thrown the whole county of Galway into consternation.

There are three ways of regarding these melancholy occurrences: the one as a sort of political confederacy in crime, spreading throughout the kingdom in every direction—the other, as merely disconnected and solitary symptoms of a state of society, overstocked with population, and ill-instructed in their relative duties—the third, as mere robberies and murders, having no source deeper than the depravity of the individuals concerned in their perpetration.

Perhaps it will be found that each of these causes is at work. The robberies of arms that have prevailed within the last three or four months, particularly in the South of Ireland; the disturbed spirit which has broken out in the centre of the kingdom, and to counteract which Associations have been entered into by the Gentry, show a predisposing tendency to a state which cannot be contemplated without dismay. With regard to the atrocities that have been committed in the North and West, and particularly with respect to the murder of Mr. Browne, the laws, we hope, will be found sufficient to detect and to punish the perpetrators. But we cannot too forcibly impress on the Gentry in every part of Ireland the necessity of associating, and the paramount necessity of remaining on their estates. It may be an unpleasant duty—but it is a duty that must be performed, if they would preserve their property. The Duke of Leinster furnishes a noble example of what a resident landlord should be. If his Grace's example were generally followed, we should not have the melancholy task of putting the following statements and facts upon record:—

KING'S COUNTY.

At a Meeting of the Magistrates and principal inhabitants of Parsonstown and its vicinity, held in Dooley's Ball-room, on Thursday, the 30th day of Dec. 1819, the Earl of Rosse, in the Chair, the following Declaration and Resolutions were unanimously agreed to:—

"The Magistrates and principal inhabitants here assembled observe, that it is with deep regret they learn from different sources of information, that many of the lower class in this town and its vicinity, as well as in the county at large, have entered into a conspiracy against the Laws and Constitution of their Country, and that in order to accomplish their designs on both, have united themselves by an illegal oath; have plundered houses for arms, and have assembled together in a large bodies, by night, in order to form plans, as it is supposed, of attack, and fix on the time for commencing acts of hostility. They further observe, and they mention it with great satisfaction, that though the spirit of disaffection has spread to a considerable extent, and is active in its operations, that it is wholly confined to the lowest of the people, and that even a great portion of that class is still free from its influence, notwithstanding the efforts made to seduce it, and what within the last few days, many of the misguided people in the neighbourhood of Phillamore, yielding to the remonstrances of their excellent Pastor, the Rev. Dr. Kearney, have deposited with him their arms, and determined to abandon the wicked projects in which they were engaged, an example worthy of general imitation.

"They think it advisable in order to prevent those who may be unconsciously disaffected, (if any such there be) from any attempt to carry their schemes into execution; in order to secure those now free from infection, from being induced to depart from their Loyalty, and in order to give confidence to the Magistrates in enforcing the laws and maintaining public tranquillity, that the following Resolutions be adopted and immediately put into operation."

The Resolutions are eight in number. They recommend the immediate forming of an armed association of all persons attached to the Government and Constitution, consisting of cavalry and foot soldiers, the former to be employed in patrolling the high roads at night; the latter in preserving the peace of the town. Persons who, from age or other infirmities, are incapable of setting personally, are requested to subscribe such a sum as may procure a substitute. All public houses, (the inns alone excepted) are recommended to be shut up at eight o'clock every night, and no persons admitted into them except members of the family, and travellers, till the next day.

(From the *Dublin Evening Post*, Jan. 20.)

By our letters from Galway we find the county is, as we stated in our last, thrown into a state of consternation. A Requestion signed by Lord Castlereagh, Mr. J. Daly, one of the Members for the County, and several other Gentlemen of the first respectability, has been handed to Mr. Kelly, Clerk of the Peace, for the purpose of calling a County Meeting.

The following paragraph is dated Galway, Monday, Jan. 17:—

"A rumour prevailed very generally in this town yesterday, that late on the preceding evening, three men, decently attired, knocked at the half-door of the Albert, and handed the servant a letter for Mr. Blakeney, the purport of which was 'that if Mr. B. continued to harbour a certain Rev. Gentleman in his house, that the following night a body of men, in number exceeding 800, would call at the house, which they would demolish, and afterwards inflict a summary punishment on Mr. B.' The Rev. Gent. alluded to, has lately made himself (we know not how justly) very obnoxious to those deluded wretches, denominated Ribbonmen. It was also stated, that this Rev.

Gent. at the instigation of Mrs. B. left Abbert the following morning, being previously put under the protection of a military escort."—(*Connaught Journal.*)

We hope that this will prove incorrect; but, with respect to the Rev. Gent. alluded to, we do not see any reason for concealing his name. He is a Mr. O'Rourke, and has in an especial manner distinguished himself against the Ribbonmen; so laudable has been his conduct that he was thanked by the Magistrates lately assembled at Moylough, for his activity. The Vote, we believe, was moved by Mr. Bellew, of Mount-Bellew, a Catholic Gent. of great property of the highest respectability in the County. Mr. O'Rourke, we have heard, is now safely lodged in the Palace of his Grace the Archbishop of Tuam, so that his friends need entertain no apprehension as for his safety.—(*Courier.*)

* The particulars of this murder were inserted in the *Messenger* a few days since.

LAW INTELLIGENCE.

SERJEANTS-INN-HALL, Jan. 17.

Thompson v. Dacey.—Motions for New Trials.

This was an action of trover for wearing apparel, whereby the plaintiff sought to recover the value of a quantity of clothes contained in two trunks. The defendant is the keeper of a tavern or coffee-house called the Globe-tavern; there are no stables belonging to it. The plaintiff, a merchant's clerk, in company with another person, came to the defendant's house, and dined there; after dinner, he said they should sleep there, and ordered a double-bedded room. The plaintiff afterwards told the defendant he expected two trunks, that he was going to Scotland in a few months, and that he meant to stay there till he went. The defendant asked him for his name, which he gave him, and informed him what he was. The trunks came, and the plaintiff resided there three months, sleeping in the house, and taking his meals during which time a friend of his came and stayed several days; and the plaintiff ordered the charges of his friend's living to be put into his bill.—After the plaintiff left, he tendered to the defendant more than sufficient pay for his sleeping, but not enough to discharge the whole bill, and demanded his luggage, which the defendant refused to give up. And the question on the trial was whether the defendant had, in the character of innkeeper, a lien on the luggage for the amount of the bill.

The Learned Judge who tried the cause was of opinion that the defendant had a lien, and nonsuited the plaintiff giving him leave to move for a rule to enter a nonsuit. And now Mr. Marryatt and Mr. E. Lawes moved to discharge that rule. They contended, that there was a difference between the keeper of a tavern or coffee-house and an innkeeper; that they were both liable to the same burthens, each being obliged to take out an ale licence and each being subject to have soldiers quartered on them. The landlord, they contended, would in that be answerable for the loss of his guest's goods. It was not necessary that the innkeeper should have a stable; could the name written over the door, whether "tavern" or "coffee-house," make a difference: the only thing to be considered was the purposes for which the house was used; here it was used for the same purpose as an inn.

Mr. Gurney and Mr. F. Pollock, in support of the rule, contended, that there was a material difference between a coffee-house and an inn; a coffee-house was not intended for the reception and abode of travellers, but merely to furnish dinners and other entertainment to the tenants of the place where it was situated; that of the coffee-house keeper found it convenient to furnish guests with beds, which he did; but that he could not as a letting of lodgings to them, and did not convert a coffee-house into an inn.

Justice Bayley asked what constituted the difference between a coffee-house and an inn in law. Mr. F. Pollock answered:—"The purposes to which were applied: he considered the bells, stables, and houses of that nature, which had stables, and in which coaches and waggons went, were properly inns, and were for the reception of travellers."

The Lord Chief Justice said, the defendants were keepers of a house in which they supplied beds and rooms to such persons as required them. He thought could not be distinguished in principle from any other cases of innkeepers. It would be for the benefit of parties so to consider it: for in this case not only the innkeeper be entitled to a lien on his guest's goods, but also in return would be liable to his guests for the custody of their goods. He thought it was not that the defendant should have stables; some of them be for the accommodation of foot travellers. Learned Judges present, Justice Bayley and Mr. Best, delivered their opinions to the same effect, and the rule was discharged.

Thus, it is decided, that it is legal for a Coffee-house to detain trunks in cases of non-payment of bills.

MARLBOROUGH-STREET.

MYSTERIOUS CASE.—On Saturday night a gaiter which excited the greatest interest, and very late hour, came on at this office before J. Esq. the Sitting Magistrate.

Elizabeth Barnes, a girl 16 years of age, was in the custody of Park, the officer, charged by Wright, linen-draper of Foley street, Mary, his suspicion of having at several times set fire to his furniture. She was also charged with some extraordinary means, set fire to the wig of Mrs. Wright, at different times, by which she were burnt off her back, and injured her eyes, so that her life is despaired of.

The office was crowded to excess. Mr. Wright the prisoner had been servant in the house for 10 years, but they never suspected her of any thing wrong, were induced, from the following extraordinary instances, to entertain an idea that she had been destroying the house and family. Wednesday, Jan. 5, about half past eight o'clock, his mother in the parlour by herself, and the prisoner shop alone; his mother was seriously alarmed.

PARIS, FEBRUARY 5, 1820.

Tros Tyriusque mihi nullo discrimine agetur. — VIRGIL

After mass, which the King heard in his apartments, his Majesty presided at a Council of Ministers; after which a private Council was held to discuss the alterations to be made in the Law of Elections.

To-morrow the Court will go into mourning for the Electress of Hesse Cassel, which will last during eight days.

With a desire to meet the natural anxiety which must be excited in our readers in respect to the late melancholy and momentous event in Great Britain, we shall to-morrow publish Supplement to this day's Paper.

From the variety of accounts which have come to hand this day respecting the existing affairs of Spain, all tending to show that the spirit of revolt appears rather to be gaining ground than to be overcome, we deem it prudent to wait for more unequivocal authority, and more clearly connected details, before we refer them to the public. The *Journal de Paris*, however, states, that Cadiz is likely to fall.

The Ball which was to have been given by Her Royal Highness the Duchess of Berry the day before yesterday, was put off on account of the death of the venerable Monarch of England.

It was rumoured yesterday afternoon that Cadiz was taken by the Insurgents.

To-morrow there will be a grand fencing match (*assaut d'armes*) and a Concert, in which M. Le Vasseur will sing a *Mourne Italian* duet, at the *Wauxhall*, *Boulevard de Bondi*. The entertainment will commence at one.

We learn from Vienna in date 24th ult. that the complete thaw had taken place there, the ice was almost entirely off the ground, but the ice is still frozen, and the sudden change of the ice is much dreaded. There is no news except the *apocryphal* preface addressed by M. de Metternich to the Austrian Ministers, which has been inserted into certain Journals.

With the request of several Ladies and M. Spurzheim will deliver a Course of Lectures on the Moral Feelings and Intellectual Education. He will begin on Monday next the 7th inst. at 8 o'clock in the afternoon, at his lodgings, No. 3. The Course will consist of 12 lectures, continued every day, except Sunday, at the rate of 20 francs.

LONDON, JANUARY 31.

On Monday last, it was our melancholy duty to communicate the sad tidings of the Duke of Kent's death. — To-day — one short week only elapsed — we announce the parting struggle of his venerable and much afflicted Sire. — Father and son — the Monarch whom we have loved — and the Prince whom, as our Monarch, we might have had equal cause to love hereafter — both are gone! Death, indeed, has had a frightful harvest in our palaces. Scarcely 2 years have elapsed, and four generations have descended to the tomb. The nation's grief had but begun to soften down into resignation, after the untimely withering of our lamented Princess and her first born, when our gracious Queen bowed before the inevitable destiny of man, and now, her husband and her offspring sleep with her. These are visitations that make men think and tremble. They force the most unreflecting, to bestow, at least a transient thought upon what awaits themselves. The last hour must come to us all. When it shall come we cannot appoint: but how it shall find us, and what consequence it shall bring with it, are things within our controul.

We cannot say that the death of our revered and venerable Sovereign has come upon us suddenly. His age, his infirmities, and the common rumour of the last two or three weeks, must have prepared the whole nation for the afflicting event. Yet, it seems to be the condition of our nature, that no preparation can wholly arm us against the shock which follows the dissolution of those we love. Their loss leaves the mind in a state of dreary desolation. It is a state which no longer cheer us with its blandishments: self-delusion can no longer flatter: the object of our affections lies dead before us: and alas! the dead cannot be re-animated. A thousand tender recollections of the past rush upon our memory, only to aggravate sorrow for what cannot be restored, and to increase regret for what cannot be recalled.

This, we are sure, will be the feeling of the country under its present loss. Never did the Sovereign of any people, sink into the grave, so loved, so honored, as the gracious Monarch whom we now deplore. Nor party rage — nor political animosity — nor disappointed ambition — nor battle intrigue — nor even disaffection itself, was ever heard to breathe a whisper that could sully the blameless parity of his life. Those who hated Kings were yet forced to confess, that he was incapable of provoking hatred. The virtues of the man disarmed the enemies of the Monarch; and for years past, none spoke of him but in the affectionate and emphatic phrase of "our good old King." Yes — and if his name shall go down to posterity with any epithet to mark his character — let him be called GEORGE THE GOOD, and our children's children to the latest generation, will learn from that one word, why we loved him.

The virtues he delighted in were not those by which the vulgar admirers of Kings are captivated. He did not seek, maddened by the lust of ambition, to vanquish realms, and write his glory in the blood and tears of desolated nations. His was not the fame of the conqueror, in the composition of which must always be found some portion of those grim qualities that disgrace the tyrant. It was in the endearing intercourse of private life that were to be traced the virtues which adorned his character. Pious — temperate — benevolent — modest — a kind husband — an affectionate father — a gentle master — a steady friend — uncorrupted by power — undazzled by the splendour of his station — he lived among us, and he ruled over us, above half a century, the bright model of what a King, a Christian, and a man should be.

It was in the bosom of his family, and in the discharge of all those sacred duties which grow out of the relations of son, husband, father, brother and friend, that the primary virtues of George III. were to be traced. The simplicity of his manners, when laying aside the sometimes

necessary pomp and dignity of his station, formed a striking and pleasing contrast. He was gracefully familiar with those whose rank permitted their approach to the Royal person, and benevolently condescending towards others who had no such privilege. A thousand amiable anecdotes are upon record, or floating upon the breach of popular tradition, which, as long as they are remembered, will portray the goodness of his heart. The pious wish he expressed (only a short time, we believe, before the alienation of his mind) "that he hoped to see the day when every child in his dominions would be able to read the bible," ought, of itself, to carry down his name with reverence to the latest posterity.

We hardly wish to withdraw the veil which has so long shrouded his daily course of life from the gaze of curiosity. The circumstances, if disclosed, would be read with a deep and melancholy interest. Imagination, indeed, may half supply the reality. We can conceive the aged Monarch, in the solitude of his mental affliction, in the double solitude of his visual darkness, wandering forlorn and helpless through the apartments of that Palace where, in happier times, he had passed so many hours of his blameless life. To have been permitted to view him under such circumstances, would have softened the most obdurate heart, while it must have inspired all kinder natures with a profound sense of their common infirmity. The virtuous Monarch of a mighty Empire, so sorely stricken by the hand of Providence, that had he been vouchsafed the favour to choose, he would have exchanged conditions with the meanest peasant in his realms, was a spectacle, whose sublime and touching morality might employ the pen of a Bossuet or a Fletcher. We dare not approach the theme. — (Courier.)

Still, however we hover over this melancholy subject of his last moments. It must be a source of the deepest satisfaction to every Member of the Royal Family, as well as to the people, that the Duke of York was with his Majesty at the awful moment of his dissolution. To his Majesty however the moment was not awful. — As unconscious of approaching dissolution as if he were sinking only to a gentle and quiet slumber, death had no terrors for him. "Oh, Death, where is thy sting — Oh, Grave, where is thy victory?" His Majesty was not heard to speak a word for two hours before his dissolution. The last words he uttered, consisted, we understand, of a short question upon a subject in itself of no importance. He then lay perfectly quiet and still — not a groan escaped him — and not the least indication of returning reason, nor a ray of mental sanity broke through the last moments of his life. — His affectionate Son, the Duke of York, remained by the bedside of his dying Parent till the last breath, for there was no struggle, had passed away.

Yet, the release of an excellent and venerable Monarch from this mortal life — for who could have wished that that life should have been prolonged which was not cheered by one ray of reason, which was passed in the most helpless solitude? — "he state among his kindred, yet he knew them not — his children spoke to him, but he heard them not." Yet, now that the event has happened, it has produced a universal sickness and sorrowing of the heart. It is as if we had lost a father — he was the father of his people, and though he has been long dead to himself, he was still not dead to us. Though all intercourse had been cut off between us — though we no longer saw him among us — though the communications we received relative to him were in the nature almost of communications from the tomb — yet still he lived — the form, the person of the venerable Monarch remained — he was still the object of our solicitude and care — his aged form still reclined in the arms — his head was still pillowed by the bosoms and hearts of his people — All this hath passed away — he is gone to receive the reward of his virtues, and in this our grief, let it be some consolation to know that his last moments, the last trying struggle of our poor feeble nature, passed gently over his venerable head.

The Royal mind

An easy passage found

And left its sacred earth behind;
 Nor murmuring groan express'd, nor labouring sound,
 Nor any, least tumultuous breath.
 Calm was his life, and quiet was his death;
 Soft as those gentle whispers were,
 In which the Almighty did appear.

That peace which made his prosperous reign to shine,
 That peace that leav'd to the imperial line,
 That peace, Oh, honour'd shade, be ever thine!
 Another source of consolation is, that the sceptre hath passed into congenial hands — that it is wielded by a Monarch worthy to be the Son of such a Sire — that he hath followed his principles, sustained his system, and walked in his steps —

Sol occubuit: nox nulla secuta est.

We have already observed, that the three longest reigns in British history are those of three Kings, each the third of their respective names. Henry III. reigned 56 years; Edward III., 51; and George III., 59. This circumstance is beautifully alluded to in the following lines, which are at once an accurate and an appropriate eulogy on his late Majesty.

Chaste, pious, steadfast, merciful and just,
His pride, his people—and his God, his trust!
To the third George, approving Heaven ordain'd
A life unblemished, and a death unpaired;
In goodness, greatness, years, his reign exceeds
Henry's mild life, and Edward's laurel'd deeds.

DEATH OF THE KING.

(From the Courier.)

There is not an English heart in the world that will not sorrow at the tidings which we are now compelled to announce. Our aged and excellent Sovereign is dead! and of the man under whom three generations have been governed in wisdom and holiness, prosperity and glory, all has past away but the immortal remembrance of his kingly virtue!

His Majesty George the Third expired in Windsor Castle, at thirty-five minutes past 8 o'clock on Saturday evening. He breathed his last without a struggle or any appearance of suffering.

H. R. H. the Duke of York, who was present, as Custos of his Majesty's person, immediately sent off a letter to the Prince Regent, by Gen. Cartwright. He reached Carlton-house with the melancholy intelligence at 25 minutes after eleven o'clock. H. R. H. had not retired to rest, and in a few moments was put in possession of the event, which, although not altogether unexpected, from the communications which he had received during the day, was, nevertheless, a severe additional pang to that which he had so recently sustained from the death of his Royal Brother. H. R. H. was overwhelmed by the contents of the Duke of York's letter, which, although short, he could scarcely read to a conclusion. After an interval of filial anguish, he sent back a letter of condolence to his no less afflicted brother at Windsor.

An officer of his royal highness's household was then dispatched to the Lord Chancellor, at his residence in Hamilton-place, to acquaint him with the death of his old and venerable Sovereign. Messengers were likewise sent off to the rest of his Majesty's ministers, who are in or near town, and to the several branches of the royal family.

The public had been in some measure prepared for this sorrowful event. Ever since the last official report of the state of his Majesty's health, he has been declining. His medical attendants have been constantly in the palace, exerting themselves rather to alleviate his sufferings, than with any hope of prolonging a life already extended beyond the ordinary limits of human existence.

The mental disorder of our Monarch, and the want of out-door exercise, necessarily attendant upon it, together with his advanced age, had at length undermined his excellent constitution, and reduced him to such a state of nervous sensibility, that the slightest change in the atmosphere instantly affected his bodily health; and consequently the extreme rigour of the present winter could not but produce serious indisposition. His Majesty, about two months ago, after suffering much from a severe cold, was attacked by a species of slight diarrhoea; but, after some days, the disorder yielded to anodyne and astringent medicines, and all apprehensions with respect to it had ceased. Within the last fortnight, however, the disorder had returned with more violent symptoms, and in despite of the skill of the physicians, several of whom had been in continual attendance, it had hitherto continued unabated. In the night of Friday last all the symptoms assumed a more alarming appearance; and early on Saturday morning Sir H. Halford came express to town, and had an immediate audience of the Duke of York. His royal highness's carriage was instantly ordered, and he set forward with post horses for Windsor Castle.

His Royal Highness appeared agitated as he got into the coach; and there was but too much reason to anticipate the distressing nature of Sir H. Halford's communication. At ten o'clock on Saturday morning, the medical attendants, and the lords in waiting, felt assured that the last hour of the venerable sufferer was approaching, and that the day must terminate his mortal career.—As the evening advanced, his Majesty became gradually weaker

and weaker, but apparently without the slightest pain, till nature was quite exhausted; at 35 minutes past 8 o'clock, he breathed his last without suffering even a struggle. The decay, though rapid, was unaccompanied with any violent and sudden changes; so that none of that physical excitement had occurred which sometimes, in cases of mental derangement, restores to sufferers, in their last moments, a transient use of their understanding, and embitters the parting hour with a consciousness of their late dreadful situation. H. R. H. was in the room at the time of his Majesty's death, and hung over his pillow with the most affectionate solicitude.

There was no returning visit of his reason, which could only have served to torture him with a sense of what he had lost, as well as what he was about to lose. It is true that, from this insensibility, he could not have the melancholy satisfaction of witnessing, by his death-bed, the affectionate duty of the Duke of York, but then he was saved from the anguish of missing the aged partner of his throne, his beloved grandchild, and that estimable prince whose many virtues so nearly resembled his own.

The rapid movements of official personages throughout Saturday and the preceding day strengthened the accounts of the alarming crisis which his Majesty's indisposition had attained. Late on Friday evening, the Earl of Liverpool set off to Windsor, where he remained the whole of the night. All the messengers of the House of Lords had been in hourly attendance upon Sir T. Tyrwhitt, the Usher of the Black Rod, during the last two days. The fires in the House of Lords were kept regularly lighted, as if the Peers were sitting; and Mr. Cooper, the Deputy Clerk of Parliament, through whom, we believe, the summonses for the immediate convocation of Parliament should issue on the demise of his Majesty, arrived in Palace-yard at 3 o'clock on Saturday, rather unexpectedly. Soon after his arrival, he communicated with Sir T. Tyrwhitt, and Mr. Quarme, the Deputy Usher of the Black Rod. The Archbishop of Canterbury was at Lambeth Palace on Saturday, having specially arrived from the country. Our readers are not perhaps aware that Parliament must, if possible, meet on the day after the demise of the Sovereign. If the melancholy event occurred even during a dissolution of Parliament, the former Members re-assume their functions, and assemble forthwith for the dispatch of business.

The Lords in Waiting, who were Lord St. Helens and Lord Penley, were noticed to remain longer at their post and to quit their charge for shorter periods than usual. His Majesty in the early access of his second attack, rejected animal food. The most nourishing diet, in every form that could be devised to tempt his appetite, was prepared for him, but seemed to fail in its purpose of sustaining or recruiting exhausted nature. A few days before his death he became reduced almost to a skeleton. The general decay to which his constitution was now subjected showed itself in the usual symptoms. It was evident that his blood was becoming torpid and chilly; for though artificial means were used to raise the temperature of his apartments, yet he continued to manifest increasing suffering from cold. Among other distressing proofs of his debility and approaching dissolution, he lost his remaining teeth; he also lost his appetite, which had been previously so hearty, that it had been usual to medicate his food in order to procure digestion and prevent any injury from the tendency to excessive indulgence.—It was not, however, till within two days of his decease that he kept his bed entirely, though for several days past he had not risen at his accustomed early hour.

At the moment of his dissolution, there were present, besides the usual attendants, his Royal Highness the Duke of York, Lord Henry, Lord Winchelsea, all the Physicians, and General Taylor. In the Palace were the Duchess of Gloucester, the Princesses Augusta and Sophia, and some reports add, the Duchess of York. Immediately after the decease, the Duke of York retired and despatched Gen.

Cartwright with the mournful and important intelligence to the Prince Regent. His Royal Highness did not himself leave the Castle till yesterday morning. The Duchess of Gloucester proceeded to Bagshot about half an hour after the death of her Royal Parent: her sisters remained behind. Doctors Baillie, Heberden, and Willis, were yesterday at the Castle.

In the course of yesterday the following Gazette Extraordinary was published:—

Whitehall, Jan. 30, 1820.

A letter and inclosure, of which the following are copies, have been this morning received from his Royal Highness the Duke of York, by Lord Viscount Sidmouth, one of his late Majesty's Principal Secretaries of State.

Windsor Castle, Jan. 29, 1820.

My Lord—It becomes my painful duty to acquaint your Lordship, that it has pleased Almighty God to take unto himself, the King, my Beloved Father, and Our Most Gracious and Excellent Sovereign. He expired at 35 minutes past 8 o'clock, P. M.

I enclose the Certificate of all the Physicians in attendance at this melancholy period.

My Lord, ever

Your most sincerely,

(Signed) FREDERICK.

The Right Hon. Visc. Sidmouth, etc. etc. etc.

Windsor Castle, Jan. 29, 1820.

It has pleased the Almighty to release his Majesty from all further suffering. His Majesty expired, without pain, at 35 minutes past 8 o'clock this evening.

W. HEBERDEN, R. WILLIS,
DAVID DUNDAS.

For his Royal Highness the Duke of York.

At three o'clock yesterday morning, the following letter was received by the Lord Mayor:—

Whitehall, Jan. 30, 1820.

"My Lord,—It is my painful duty to inform your Lordship of the demise of his late Majesty King George III. This melancholy event took place, without the least apparent suffering, at Windsor Castle, at 31 minutes past 8 yesterday afternoon, to the great grief of his present Majesty, and of the Royal Family.

"I have to request that your Lordship will give directions for the tolling of the Great Bell at St. Paul's Cathedral.—I have the honour to be your Lordship's most obedient humble servant,

"SIDMOUTH."

"To the Right Hon. the Lord Mayor, etc."

St. Paul's Bell commenced tolling at 12 o'clock. It was preceded by the tolling of all the other Church Bells in London.

Pursuant to orders from the Dean, the great bell of the Abbey began to toll at one o'clock, and continued to do so during the day, in consequence of the demise of his late Majesty; the great bell of St. Margaret's was also tolled during the whole of the afternoon.

The event has excited the strongest sensation throughout the metropolis.

THE FIRST COURT OF HIS MAJESTY KING GEORGE THE FOURTH.

Yesterday, at two o'clock his Majesty King George the Fourth, held his first Court since his accession to the Throne, as a matter of State necessity (all authorities having ceased on the demise of King George III.), at Carlton House, now his Majesty's Palace.

The Court consisted of all the male branches of the Royal Family now in England, most of the Cabinet Ministers, the great Officers of State, the members of the Privy Council of the late King, and a numerous assemblage of the Nobility, Members of the two Houses of Parliament, the Lord Mayor of London, the Court of Aldermen, &c.

His present Majesty having declared himself success to his late Father, our late highly venerated Sovereign, the Oaths of Allegiance, &c. were administered by count Chetwynd, the Clerk of the Council, who afterwards took the same himself, which were administered by Buller.

His Majesty afterwards commanded a Privy Council be holden, when all those present of his late Majesty were resworn Privy Counsellors to his Majesty, King George the Fourth, consisting of

Their Royal Highnesses the Dukes of York, Sussex, Gloucester, and Prince Leopold, the Duke of Cambridge, Lord Eldon, the Duke of Devonshire, the Marquis of Hertford, the Marquis Wellesley, the Marquis of Salisbury, the Earl of Chatham, the Earl of Liverpool, the Earl Mulgrave, Viscount Melville, the Duke of Devonshire, the Marquis Camden, the Bishop of London, the House of Commons, Sir Wm. Scott, Sir Wm. Scott, Mr. T. Wallace, Mr. Arbuthnot, Mr. J. B. R. S. J. Nicholl, Mr. F. J. Robinson, Mr. Sir R. R. B. Bourne, the Hon. C. Bagot, Sir B. Bage Chancellor, Chief Baron of the Exchequer's Bench, Lord, the Lord Chief Justice of the Court, &c.

A form of Proclamation was then the Fourth claiming his present Majesty King Britain, etc. Sovereign of the United Kingdom Privy Council, which was sworn by all the above-named

The following were also sworn of State for occasion by Lord Sidmouth, who read the the Home Department, to whom Council, when Proclamation as agreed upon by

Deans of Westminster, Mr. Banks, Lord Ellenborough, Sir Geo. minister, Chester, and Captain of Carlisle, the Clerk, the Earl of Aylesbury William Currie, Lord Mayor of London, Messrs Shaw, Sir John Ewer, Sir J. word Bearer and Chaplain, etc.
All the Cabinet Ministers of his late Majesty, now in
town, yesterday morning resigned their credentials of
office to Vis. Sidmouth, Principal Secretary of State for
the Home Department, at his office at Whitehall. His
Lordship afterwards presented them to his present Ma-
jesty, at Court, when the King was graciously pleased to
re-appoint them in their situations. The Lord Chan-
cellor appeared in a plain dress only, carrying a bag con-
taining the seals of the United Kingdom, which his Lord-
ship resigned to his present Majesty, when the King was
graciously pleased to return them, and re-appoint him to
his former office. Vis. Melbourne and Col. Walley were
the Lord and Groom in Waiting.

The Duke of Gloucester came to town yesterday morning from his seat at Bagshot Park, to be present at the King's Court, to take the oaths of allegiance and to be sworn in a Member of his Majesty's Most Hon. Privy Council.

The Earl Bathurst and Vis. Sidmouth were in town, from Putney and Richmond Park, by about seven o'clock yesterday morning, in consequence of having received notices of the death of the late King, and waited upon his present Majesty, at his Palace in Pall-mall.

The Privy Council sat till near four o'clock in the afternoon, when they gave orders for proclaiming his present Majesty, George the Fourth, King of the United Kingdom; but as the day of his accession to the Throne, was the anniversary of the Martyrdom of King Charles I., which is observed by statute as a solemn fast in the ritual of the church service, it was not considered proper to make Proclamation on that day.

HOUSE OF LORDS, SUNDAY, JAN. 30.

The effect was altogether an impressive scene. Behind the Throne, and upon the steps leading to it, were several of the Members of the Commons' House. Among the Noblemen present, we noticed the Earl of Liverpool, the Dukes of Athol and Montrose, Earl Nelson, Lord Ellenborough, the Archbishop of Canterbury, and the Bishop of London. The Lord Chancellor spent some time in conversation with the Noble Lords.

HOUSE OF COMMONS.

Queen Anne died on Sunday, the 1st of Aug. 1714 on which day both Houses of Parliament met and sat according to the directions of the Statute, though they were then separated by a Prorogation, and were not to be met till the 10th of August. So upon the demise of George the Second, which happened on Saturday, the 11th of Oct. 1760, both Houses met upon the next day, Sunday, the 26th of Oct. for the purpose of taking the Oaths, though the Parliament was at that time separated

As the meeting of the two Houses of Parliament was generally expected, early in the afternoon of yesterday, a vast concourse of people were seen in the vicinity of Westminster Hall, hastening to witness the approach of the Members, and making the most eager enquiries on the expected proceedings of the day. All were penetrated with the deepest melancholy—all proved by the appropriate solemnity of their deportment, that it was universally felt that in the late Sovereign, the father of his People had expired.

The ceremony of proclaiming his present Majesty, George IV., will take place this day at twelve o'clock.—Orders to that effect were received yesterday at the Herald's Office. The Proclamation will be made before Carlton House, where the Officers of State, Nobility, and Privy Counsellors will attend, with the Officers at Arms, all on foot. The Officers at Arms, being mounted on horseback, will then proceed to Charing cross, where they will halt, and proclamation will be made again. They will then proceed up the Strand, and the same ceremony will be repeated within Temple-bar. Proclamation will be made again at the end of Wood-street, in Cheapside; and lastly, at the Royal Exchange, with the usual solemnities. The principal Officers of State, a great number of the Nobility, and other persons of distinction, are expected to attend during the whole ceremony.

"Whereas, it has pleased the Almighty God to call to his mercy our late Sovereign Lord, King George the Third, of blessed memory, by whose decess the Imperial Crown of the United Kingdom of Great Britain and Ireland, is solely and rightfully come to the high and mighty Prince, George, Prince of Wales; We therefore, the Lords Spiritual and Temporal of this Realm, being here assisted with those of his late Majesty's Privy Council, with numbers of other principal Gentlemen of quality, with the Lord Mayor, Alderman, and Citizens of London, do now hereby, with one voice and consent of tongue and heart, publish and proclaim that the high and mighty Prince George, Prince of Wales, is now, by the death of the late Sovereign, of happy memory, become our only lawful and rightful liege Lord, George the Fourth, by the Grace of God, King of Great Britain and Ireland, Defender of the Faith and so forth, to whom we do acknowledge all faith and constant obedience, with all hearty and humble assention; beseeching God, by whom Kings and Queens do reign, to bless the Royal Prince, George the Fourth, with long and happy years to reign over us.

George I was declared King on the 1st of Aug. 1714.
George II on the 11th June, 1727.
George III on the 25th Oct. 1760.
As the reign of the late King terminated on Saturday

by the reigns of the three Georges was 105 years, five
months and 29 days.
His reign on the 1st of Aug. 1714.

George I. commenced his reign on the 1st of Aug. 1714. The Privy Council assembled soon after the Queen's death, and caused the King to be proclaimed. The Queen expired between seven and eight o'clock in the morning, and at six o'clock in the evening of the same day the Members of the House of Commons assembled, in order to take the usual oaths to the new Sovereign, before the Lord Steward; but as the Speaker, Sir Thos. Hanmer, was absent, the oaths were not administered until the following Wednesday, when the Speaker, to whom a flying post had been dispatched, to inform him of the demise of the Crown, came to London, two days after the Queen's death.

George I. expired on Sunday, June 11, 1727, but Parliament being then prorogued, the oaths were not administered to the Members until the Thursday following, when Parliament was further prorogued, by commission, until the 27th of the same month.

George II. died at Kensington Palace, between seven and eight o'clock in the morning of Saturday, 25th of October 1760. On Sunday, the 26th, the Members of Parliament assembled, but the oaths were not administered to the Members of the House of Commons until the following Wednesday, in consequence of the absence of the Lord Steward, the Duke of Rutland, who had gone on a hunting party into the country.

As the Parliament was then in a state of prorogation, it was further prorogued by proclamation, after the Members were sworn, until the 18th of the following Nov., the day to which it had been prorogued in the reign of the former King.

The opinion generally entertained is, that Parliament will be prorogued immediately after the Houses shall have

WINDSOR.

"It is my painful and distressing duty to announce to you the death of our revered and beloved Sovereign, who departed this life at 35 minutes past eight o'clock yesterday evening. I have delayed this communication until the latest moment, in order that I might send you the fullest and most accurate information relative to the lamentable event that has taken place.

posed. It is highly honourable to the persons in immediate attendance upon his Majesty, that during the long period of his afflicting malady, no improper disclosures concerning his domestic habits have been made by those who had the means of personal observation. An affectionate veneration for a beloved Sovereign prevailed over all the temptations of idle curiosity, and no unauthorised eye has invaded the privacy of his retirement. During our lamented Queen's life, she judged it necessary to draw a strict line as to the persons who were to be admitted into the presence of the King, in order to guard against any unpleasant or imprudent communications. The most afflicting privation was that which prevented the whole of the Royal Family, with the exception of the Prince Regent, from approaching him; but her Majesty in this, as well as all the delicate public occurrences in which she was concerned, acted from the purest motives of State prudence.

prudence.

“The total blindness and increasing deafness of his Majesty gave great facility to his medical and other attendants in the performance of their duties. Until very lately it has been his usual custom to dress and undress himself without any assistance; indeed, he had a particular aversion to any of his domestics assisting him, and hence arises the circumstance of his beard having grown so long. It was always with the greatest reluctance that he permitted the hair-dresser to perform his operations, and he frequently in consequence let his beard grow for several days, and sometimes weeks, until it became unpleasant to him, and then submitted very unwillingly to the necessity of removing it. His meals were extremely temperate and simple: he usually dined at once, and retired to bed at eight o'clock. One of the Physicians in waiting always attended him on these occasions. Before his deafness he frequently amused himself at the harpsichord, and seldom played anything but the music of his favourite Handel. The Royal Patient seemed never to forget that he was still a King, and this was strikingly observable in his demeanor towards his attendants, which exhibited the same mixture of dignity and affability which had always characterised his conduct to all around him. A few months ago it was deemed advisable that he should use one of Merlin's chairs, with which he was so pleased that he has since constantly been removed from one room to the other in it.

"The duty of Custos of the Royal Person was performed to the last by his Royal Highness the Duke of York with perfect final affection, and strict regard to official accuracy. H. R. H. was in close attendance on the Royal Person to the very moment of dissolution, and actually at the bedside of his Royal Parent when that afflicting event took place.

The Princesses have been most unremitting in their attention, and immediately came to condole with their Royal Brother for their distressing loss. The Princesses Augusta and Sophia still remain in the neighbourhood of Windsor, but the etiquette observable on these occasions, that none of the Royal Family shall sleep under the roof that contains the corpse of a branch of that family, prevents them from remaining at the Castle.

"The Duke of York this morning left Windsor for town, to wait upon the Prince Regent, now George the Fourth.

"It is generally supposed and understood that the Household will be immediately broken up, as the Princesses have frequently expressed their determination not to reside at Windsor after the demise of his Majesty: indeed one of them has already ceded the property to the Crown, which was left to her by the Queen. Although George IV. has hitherto shown an aversion to the town of Windsor, as a residence, there seems to be some reason to suppose, that from the magnificence of the structure, and after some reparations have been made, he will continue to hold his Court there as his predecessors have done."

By those of the King's subjects who were conversant with history, or could draw comparisons between living Princes, our late Sovereign was esteemed for the happy influence of his brave and upright character on the security and prosperity even of this free State: but it was the exemplary beauty of his private life that endeared him to the bulk of the nation. The people of England, of all his classes, had a familiar knowledge for many years of his simple tastes, his useful habits, his temperate indulgences—his cheerful, kind, and unaffected manners—his faithful fulfilment of every social obligation, his attachment to his domestic duties as a husband and a father, his assiduous discharge of the functions of sovereignty, his unostentatious munificence to the wretched, his zeal for religion, his piety to God.

All of all—except the very old, who had ceased to mingle in the affairs, or to lead the feelings of society, were born beneath the sceptre of George III. The whole people of this country, with still fewer exceptions, were formed and educated since he began to govern. His name and image had identified themselves with our earliest remembrances, and made part of our happy associations. From tradition only had we any knowledge of the times which preceded him. He was an heir-loom handed down to us from antiquity. He was the great, the living—almost the sole remnant of our loved forefathers—of that hallowed generation of parents and instructors, who had given us life, and fostered our infancy, and sowed in our youthful minds the seeds of loyalty and piety—of truth and honour. To us, the offspring of his reign, therefore, the death of our aged monarch is as if the paternal roof had fallen in, and left our chambers desolate. To other nations, the near and watchful observers of England, it will be as if some towering rock, hoary with time and hardened by the tempest—some land-mark immemorial, had sunk into the earth, and changed the bearings of the whole visible horizon.

It may be right for us to add, that it is an erroneous supposition that all Crown prisoners and others are entitled to their enlargement as a matter of course. The well-known disposition of his Majesty may induce him to make a wide and liberal exercise of his Royal prerogative of mercy; but he will be guided by the advice of his confidential servants in the selection of objects.

Every commission held under the Crown must be revived, and the fees to the Lord Chancellor for appending the Great Seal will amount to a very large sum.—*Courier*.

The following are the Notices issued at the two Theatres.
COVENT-GARDEN—In consequence of the lamented death of our late Most Gracious King, there will be no performance at this Theatre until after the funeral.
DRURY-LANE—In consequence of the deeply lamented death of his Most Gracious Majesty King George III, this Theatre will remain closed until further notice.

DECLARATION OF HIS MAJESTY GEORGE THE FOURTH IN COUNCIL.

"I have directed that you should be assembled here, in order that I may discharge the painful duty of announcing to you the death of the King, my beloved Father.

"It is impossible for me adequately to express the state of my feelings upon this melancholy occasion, but I have the consolation of knowing, that the severe calamity with which his Majesty has been afflicted for so many years, has never effaced from the minds of his subjects the impressions created by his many virtues, and his example will, I am persuaded, live for ever in the grateful remembrance of the country.

"Called upon, in consequence of his Majesty's indisposition, to exercise the Prerogatives of the Crown on his behalf, it was the first wish of my heart to be allowed to restore into his hands the powers with which I was entrusted. It has pleased Almighty God to determine otherwise, and I have not been insensible to the advantages which I have derived from administering in my dear Father's name, the Government of this realm.

"The support which I have received from Parliament and the country, in times the most eventful, and under the most arduous circumstances, could alone inspire me with that confidence which my present station demands.

"The experience of the past will, I trust, satisfy all classes of my people, that it will ever be my most anxious endeavour to promote their prosperity and happiness, and to maintain unimpaired the religion, laws, and liberties of the kingdom.

PROCEEDINGS IN THE HOUSE OF COMMONS THIS DAY.

Exactly at twelve o'clock the Lord Steward

arrived. He wore his blue sash, and carried a wand of office. In the Long Gallery two tables, one at each end of the apartment, covered with green cloth, were set out. The Clerks of the House of Commons were in attendance, and the Members who had begun to make their appearance some time before now assembled in the Long Gallery.

The Lord Steward, having passed up the Long Gallery, took his station at the centre of the table furthest from the entrance. The speaker then presented himself to take the Oaths of Allegiance to his Majesty King George the Fourth. The oaths having been administered, the Right Hon. Gent. left the Gallery and proceeded to the Speaker's apartments. The other Members present were then immediately sworn. Among them were noticed—Sir J. Sinclair, Mr. Scarlett, Mr. Arbuthnot, and Mr. Brogden. At ten minutes after twelve the lobby was ordered to be cleared.

At thirty-five minutes after twelve, the Speaker proceeded in the usual form to the House.

Having sworn in a few of the Members, who first presented themselves, the Lord Steward retired.

After entering the House and taking the Chair, the Speaker again took the Oaths of Allegiance, and called on the members present to do the same at his table. This was immediately done, and at one o'clock a sufficient number were sworn to make a House.

Mr. Canning was among the first to take his seat. Sir R. Wilson sat beside him for some time. The swearing was proceeding when this paper went to press, and nothing beyond taking the oaths was expected this day. The members were fast coming in, and a numerous attendance may be calculated upon.

The Parliament will sit for some days, in order that the Members may take the oaths to the new King. It will then most probably adjourn over his late Majesty's funeral.—*Courier*.

[CEREMONY OF PROCLAIMING HIS MAJESTY] GEORGE IV.

By ten o'clock the space fronting the Palace of Carlton-house was occupied by great numbers of spectators; and the windows of the residences in Pall-mall and Waterloo-place were crowded, chiefly with elegantly dressed ladies. Small parties of the Horse Guards then appeared, and took their station before Carlton-house, and along Pall-mall to the Opera house. The court-yard of Carlton Palace was occupied by the Foot Guards, with their colours, bands, &c. Many of the Nobility and Gentry began to take their stations round the steps of the grand entrance. The view at this time was grand and imposing in the extreme, especially when the eye was directed over the elevated space before Carlton House. The variegated colours; the fineness of the day; the sun shining at this period with peculiar brilliancy; the arrival of the Royal Dukes and the Nobility in their carriages; all contributed greatly to increase the general effect. The crowd in Pall-mall by half-past eleven became immense, but all proceeded with the utmost tranquillity.

Shortly before twelve o'clock, the Heralds, accompanied by their Officers, several Military Officers, etc. appeared on the steps under the portico forming the grand entrance. Lord Harrowby; several Members of Parliament followed; and the Dukes of York, Clarence, and Gloucester, and the Prince Leopold next appeared. The arrangement on this station was most effective, and it was improved on looking into the splendid Hall of the Palace, for there were large parties of the Officers of State, etc. Surrounded by these, and supported by his Royal Brothers and Prince Leopold, appeared his Majesty George IV. The Duke of Gloucester stood immediately in the Grand Entrance.

At twelve o'clock the guns in St. James's Park commenced firing, which was the signal for the Proclamation. Sir I. Heard, the venerable Gentleman King at Arms, then stepped forward and stationed himself in the centre of the interesting group collected around the grand entrance. This same individual was present when the late Sovereign, George III. was proclaimed King from the same spot in 1760. Sir I. Heard was then a young man, and had just entered the Heralds' College. Those about him being, as given in another part of our paper, and declared the Prince of Wales to be the present King, and declared and title of George IV. At the conclusion of this ceremony, which became more affecting from the age of the highly respectable individual making the proclamation, a company assembled instantaneously huzzared most enthusiastically without the walls evincing equal enthusiasm, and the corresponding feelings, the people filled the air with and with similar ardor they also joined in the loud, long and joyous huzzas. The waving of the swords, glistening in the sun, added considerably to the splendid character of the whole scene.

The guns continued firing. The band struck up "God

save the King," and many a loyal heart, by the satisfaction which beamed on the countenances of all, appeared to beat in unison with the sentiments of that truly national anthem. The procession of the Heralds, etc. then commenced; it formed in the Court-yard, and passed along the Crescent made in proceeding round by the Portico. It entered Pall-mall, through the upper entrance. The officers belonging to the City of Westminster, headed by Mr. Lee, the High Constable, went first, clearing the streets of the carriages and other obstructions that could be easily removed, and that might impede the march of the procession. Then followed about 50 of the Horse Guards, preceded by their officers, pioneers, etc. Some of the officers belonging to the Corporation and Companies of the City of London, a large party of trumpeters, more Horse Guards, some City Officers, then a large band of music, all being in their showy Court dresses, next appeared. The Officers belonging to the City Corporation appeared in their Court dresses also, which were additionally decorated with white favours.

The Heralds followed. Sir I. Heard and the senior officers of the Heralds College forming the rear. A band and a few more of the Horse Guards, constituted the termination of this procession. Its appearance was beautiful, and grand in the extreme, when it was proceeding in full march. The whole party as they passed along were warmly greeted with friendly huzzas, especially while they were traversing the front of the Palace of Carlton-house; and the approach of the procession towards Charing-cross, where the crowd on foot and in carriages was even greater than in Pall-mall—was announced by the plaudits raised by the assembled populace. The numbers at Charing-cross received considerable accession, by the arrival of thousands from Pall-mall, who were desirous of beholding the ceremony of the Proclamation. The increased numbers of the spectators, together with the vast assemblage of carriages of various descriptions, occasioned some interruption to the procession; but by the great activity of the officers, and the willingness of all parties to contribute to the orderly and impressive arrangement of the procession, all obstructions were speedily removed. Sir Isaac Heard, the whole party having arrived and formed in the centre of Charing-cross, end near the statue, then repeated the ceremony of the Proclamation in like manner as he had just performed it under the grand entrance of Carlton Palace.

The cavalcade then proceeded onward towards Temple-bar, preceded by an immense crowd. A troop of the Horse Guards arriving first, opened to the right and left, and having cleared a passage to the gates, the Pursuivants at Arms advanced, amidst flourishes of drums and trumpets, followed by Sir I. Heard, when the Proclamation of his present gracious Majesty was again read aloud. The gates were then unlocked and opened, and on the other side the procession was met by the Lord Mayor and City Officers, preceded by the band of the Fishmongers' Company, playing "God save the King."

The carriage of Alderman Wood, and those of other gentlemen closed the procession, which went onwards to Wood-street, Cheapside, where the proclamation was again made. In pursuance of the custom usual on such occasions, the cavalcade then went to the Royal Exchange, where the King was proclaimed for the fourth and last time, after which the procession returned.—(*Courier*.)

COURTS OF LAW.—The proceedings of the Courts of Law are this day suspended, on account of the Proclamation of his present Majesty taking place. As it is Appearance Day, however, one Judge sits in the Court of King's Bench to hear justifications of bail. The Lord Chancellor, and the Chief Justices, will attend the sitting of Parliament.

LONDON, FEBRUARY 1.

THE FUNDS.—Scarcely any business has been done this morning. Consols opened at 67 3/4 7/8, and have remained steady at that price during the morning. This is the first day of the Bank paying in Bars; but the restrictive price is 4l. 1s. 10d., consequently the demand at the Bank is not very great.—*Star*.

The two Houses of Parliament met yesterday. In both Houses the only business done was the taking the Oaths of the Peers, the form being read by the Clerk of the House. In the long gallery, the Members of the House of Commons were sworn by the Lord Steward, and afterwards the Member repeated the Oath of Allegiance in the House, in the presence of the Speaker. The Houses will, we understand, in a day or two, adjourn over to the 15th and 17th of this month, respectively, when they will again assemble merely to pass the Mutiny Bill, and on the 20th a dissolution is expected to take place.—*Herald*.

It is generally supposed that the House hold at Windsor will be immediately broken up, as Princesses have frequently expressed their determination not to reside at Windsor after the demise of his Majesty: indeed one of them has already ceded the property to the Crown, which was left to her by the Queen.—*Post*.

Every thing which his late MAJESTY in his Sovereign character, as King of Great Britain descends, together with the crown of these realms the present KING; but his MAJESTY, as is well understood, made a will, directing the descent and distribution of his real and personal property, several years ago.

The arrangements for the funeral of the late MAJESTY, and of his Royal Highness the Prince of Wales, are still undetermined;—but we understand it is in contemplation to unite both in one ceremony.

Orders have been sent to the Admiralty commanding at Portsmouth, Plymouth, Chatham, all the out-posts, as also to the Admiral at all the ships to hoist their colours half-mast high, remain so until after the funeral of his late MAJESTY. Similar directions are sent to the several garrisons.

Biographical Sketch of the late lamented DUKE OF KENT.

Edward, Duke of Kent and Strathern, 4th son of George III., was born on the 2d Nov. 1767. At 18 years of age he was sent to Germany by his Majesty's command, and resided successively at Luneburg and Hanover until he had almost completed his 20th year. During this period his "whole income consisted of an allowance of 1000*l.* per annum, of which his Governor had the sole disposal, except of one guinea and a half per week allowed to his Royal Highness for pocket-money." His R. H. then passed two years more at Geneva, without any further increase of income. He was an enthusiast to the profession of a soldier, for which he was destined from early life.—With the rank of Colonel, he commanded the 7th Fusiliers, which formed part of the Garrison of Gibraltar under Gen. O'Hara, in 1790 and 1791, some time before the breaking out of the revolutionary war with France. In that subordinate military station, his Royal Highness soon became remarkable for the diligent discharge of his own duties, and for exacting a similar punctuality from every man in his officer under him. His attention to the appearance and discipline of his regiment was altogether exemplary and unremitting. But as he could not inspire all the military world with an equal sense of the solid value of those dry, homely, and uninteresting duties which ought to employ so large a portion of military life, or with an equal taste for those minutiae of the service, of which, nevertheless, when considered in the aggregate, the correct performance adds so much to the precision and efficiency of a military machine, the Colonel of the 7th Fusiliers was for some time an unpopular Commander. Every military man is not capable of discovering in the best-conceived order or the wisest rule laid down for his observance by superior authority, the direct relation of the means to the end. It may not be thought, at first sight, of serious importance, that an officer's coat, or boot, or pantaloons, should be of a specific fashion, height, or colour; but let us consider that the excellence of an army consists in its susceptibility of collective and uniform impulses, and we must admit that uniformity in smaller things—in hourly occupations and objects of attention—say, in the form of hats or epaulettes, will contribute to enforce upon common minds the main principle of harmony in action. As harmony ought to be the characteristic of every military movement, so the spring of it must be subordination. The Duke of Kent (for the writer of this tribute to his memory was not unacquainted with his professional sentiments) laboured to communicate these two great powers to the troops, for whose qualities he was responsible. He frequently issued orders on points which were of inferior moment, and enforced them rigorously, because he had issued them. By this system, by a conscientious fulfilment of his own duties, a firm requisition of the like propriety from others, and an anxious interposition on behalf of every individual who had wrongs to be redressed or claims to be recommended, he at length carried the discipline of his regiment to the highest pitch, and established for himself the most respectable military reputation. But, in his progress towards this end, he encountered much detraction, considerable obloquy, and some resistance. Complaints were made, which injured his character at home; and mutinies were prepared by the troops, which threatened his authority, and more than once endangered his person. From Gibraltar his Royal Highness was removed to Canada in 1791, thence to Halifax, in Nova Scotia, and again to Canada, where, as Commander of the forces, he acquired no universal esteem for the justice and integrity of his demeanour. During this service in British America, he received orders to sail for the West Indies, and join in the attack on the French islands, under Sir C. Grey.

On the expedition the impetuous bravery of his Royal Highness was manifested at St. Lucie, with too little consideration for his own safety, and too much disregard for the enemy's position. The troops were repulsed; but the Duke of Kent's high personal courage obtained him the applause of the soldiers, and a flattering rebuke from the Commander-in-Chief. The next theatre of his public life was Gibraltar, the scene of his earliest military services. His Royal Highness was appointed Governor of that important garrison. A mass of abuses here waited his correcting hand. The establishment of wine-houses for the sale of liquors to the troops, had been encouraged from shameful motives in those who had the means of suppressing them, and to an extent not more subversive of the health, discipline, and morals of the garrison, than perilous to the safety of the place itself. The Royal Duke, attentive only to the welfare of the community of which he was the head, and scorning the vicious though vast emolument which some of his predecessors had derived from the sale of licenses for that illegal and rumbustious traffic, resolved to cleanse the Augean stables, and to sweep away the abomination of many years. The virtuous attempt was made; but it recoiled upon its author. It is true that the wine-house licenses were withdrawn; that the peaceable inhabitants of Gibraltar could carry on their business, and walk the streets, and repose within their dwellings at less risk of insult, outrage, or robbery; but that drunkenness disappeared among

the regiments; that cleanliness and discipline were restored, while military punishments were reduced in frequency, the hospitals emptied of their numerous inmates, and the sexton disappointed of his daily work. But we turn to other consequences. The liquor-merchants were forced to discontinue their enormous profits, and instigated the unreflecting soldiery to vengeance for the loss of those indulgences which devoured their pay and destroyed their health. Insubordination broke out on all sides; the reforming government was not supported by the local authorities; and he was sacrificed by those nearer home. The illustrious subject of this memoir, after receiving the grateful and unanimous acknowledgments of the civil population of Gibraltar, was recalled from a post in which his efforts for the public good were neither appreciated nor defended as they ought to have been; and his official services were since confined to the command of the 1st Reg. of Foot, or Royals, which his Royal Highness held with the rank of Field Marshal, and with the nominal Government of that fortress, from which his rigorous discharge of a solemn duty had been made the instrument of his expulsion.

The later years of the Duke were distinguished by the exercise of talents and virtues in the highest degree worthy of a beneficent Prince and of an enlightened English gentleman. There was no want nor misery which he did not endeavour to relieve to the extreme limits of his embarrassed fortune. There was no public charity to which his time, his presence, his eloquence, were not willingly devoted, nor to the ends of which they did not powerfully conduce. The traces of his intercourse with the inhabitants of this great metropolis on occasion of a salutary tendency to the morals and happiness of his poorer fellow-creatures, will never be effaced from the grateful hearts of those who saw and heard him.

H. R. H. was tall in stature, of a manly and noble presence. His manners were affable, condescending, dignified, and engaging; his conversation animated; his imagination varied and copious; his memory exact and retentive; his intellectual power quick, strong, and masculine; he resembled the King in many of his tastes and propensities; he was an early riser, a close economist of his time, temperate in eating; indifferent to wine, though a lover of society; and heedless of light in its position, from confidence in the general strength of his constitution; a kind master, a punctual and courteous correspondent, a steady friend, and an affectionate brother.

A less momentous task than the enumeration of these virtues, by which we are to estimate the amount of what we have lost in the death of the illustrious Prince who practised them, now remains to be performed. H. R. H. married within these two years a Princess of a noble stock—a woman fitted to make a good man happy; and to educate children not unworthy of the British Crown. She is the sister of Prince Leopold of Saxe Coburg, whom all England esteems for his private virtues, and loves for her familiarity in which this nation has been a sharer with him. His widowed sister has in her hands the presumptive throne of the British empire—the infant daughter of the Duke of Kent. Her husband's reputation is, as was his person, dear to this illustrious and afflicted lady. He was poor and in debt; nor were his debts the offspring of frivolities. We shall, however, say not one word more on this subject; but leave the memory, and virtues, and known solitudes of the Duke of Kent, to the just feeling of the nation which admires and laments him.

Particulars of the last illness of his late Royal Highness the Duke of Kent.

His Royal Highness, in a long walk on Thursday se'nnight, with Captain Conroy, in the beautiful environs of Sidmouth, had his boots soaked through with the wet. On their return to Woolbrook Cottage, Captain Conroy, finding himself wet in the feet, advised his Royal Highness to change his boots and stockings; but this he did not do till he dressed for dinner, being attracted by the smiles of his infant Princess, with whom he sat for a considerable time in fond parental dalliance. Before night, however, he felt a sensation of cold and hoarseness, when Dr. Wilson prescribed for him a draught composed of calomel and Dr. James' powders. This his Royal Highness, in the usual confidence in his strength and divine medicine, did not take, saying that he had no doubt but a night's rest would carry off every uneasy symptom. The event proved the contrary. In the morning the symptoms of fever were increased; and though his Royal Highness lost 120 ounces of blood from the arms and by cupping, he departed this life, as we have stated, at 10 o'clock on Sunday forenoon. His Royal Highness was sensible of his approaching death, and met it with pious resignation. He generously said that he blamed himself for not yielding to the seasonable advice of Dr. Wilson in the first instance, by which the access of the fever might have been checked. Every attention that skill and attention could supply were rendered to him. Prince Leopold, accompanied by Dr. Storer, arrived at Woolbrook Cottage on Saturday, at 2 o'clock, and never left his royal brother to the last.

We devote a considerable portion of our columns to the interesting extracts from the English Papers, on the affairs of Spain; they are copious, but at the present moment are entitled to take precedence of all other matter.

The meeting for the encouragement of the institution for the benefit of the Deaf and Dumb took place (as we announced) on Saturday, it was numerously and respectfully attended; great additional proofs were given of the utility of this establishment.

A petition was presented to the Chambers, proposing that the privates and non-commissioned officers of the regiments in garrison at Paris should only carry their side arms, when on duty. We have long ago seen and pointed out the utility of this measure.

Another petition was presented from M. Grelier of Nantes, for the rendering the convicts or galley slaves useful to the State, by being employed in the colonies.

The Marquis de la Fayette has submitted to the consideration of government a project for

a new general organisation of the National Guard. This is an attachment of 31 years,

A few days ago, a female passing across la Place de la Bastille, picked up a white box strongly nailed down; upon opening and examining its contents, the body of a new-born female child was found, sewed up in white linen, and having a cross placed on its bosom. It was carried to La Morgue, and the police is occupied in trying to discover the guilty person or persons connected with this unnatural act.

CHAMBER OF DEPUTIES.

Sitting of the 29th inst.

The Sitting opened a little after one o'clock; Messrs. Pasquier, Roy, Portal, Barante, Cuvier, and Capelle, were on the Ministerial Bench. The Minister of Finance produced the Budget of Government Receipts, having received orders from his Majesty that this account should follow as soon as possible that of the necessary expenditure of the State. His Excellency observed, that the first duty of the State, was to provide for the National Debt, and for the Sinking Fund, and afterwards, to dispose of the resources of the country, as not only to furnish for the present exigencies, but to prepare by economy for the alleviating the burthens of the people, these joint objects were secretly attended to, and inseparably united. The Minister now went into a financial detail; he observed, that touching the direct contributions, which could only vary (connected as they were with the extent of the population, and property attached thereto) according to the progressive encrease and growing prosperity of both: this had been felt in some measure last year, and might be looked for continuously, until it came to that moderate point which might be hoped for and expected.

The gross Accounts of Receipt and Expenditure were classified under six heads. In the 1st, or *Droit et Perceptions*, were comprised the Stamps and Journals, Registers, Bonds, Mortgages, Passports, Game Licences (*Port d'Armes*), also the produce of the Lottery, etc. etc. Under Article the 2d, the *Contribution Foncière*, the *Contribution Personnelle*, the tax on Doors and Windows, and the duty on Patents are included, and a detail is given of different rules and modifications; these taxes are all under the head of *Contribution Directes*. No. 3, contains an account of the Funds destined for the Departmental Expenditures, such as the Salaries of *Préfets*, *Law Préfets*, and *Conseillers de Préfecture*; expenses attending Central Prisons; the provision for that portion of the Clergy who are paid by the Departments; also the Sanctuary and other Medical Establishments, Poor-houses, Barracks for the Gendarmerie, the Repair of Roads, the Establishment of the Foundling Hospital in the Provinces and Departments, the sums necessary for the encouragement of Agriculture and of Horticulture, such as Nurseries and those attendant on Midwifery and Veterinary Schools.

Art. IV.—Is confined to the funds destined for the public debt *l'amortissement* which are provided for by the annuities or property sunk, by the stamps belonging to the Investments of such funds, by the produce of the Domains and Forests and the net produce of the Customs: the overplus of which, after providing for the interest of the National Debt, and the annuities is to go to the general account of the exigencies of the State.

Art. V.—Presents a kind of *resume* fixing the receipts for 1840 conformable to a statement previously made a 739,712,750. from which is to be deducted 135,375,750 for the expenses of collectors, managers, for the serving of warrants, recovery, and deficits.

Art. VI.—Details the general dispositions. The above *Projet* to be printed and distributed to the different Committees of the Chamber.

The President proposed to the Chamber to go into a Committee of Ways and Means on this day (Monday) and on Wednesday to discuss the second *Projet*, read on Saturday, which was unanimously carried. A number of petitions were read and disposed of. The House passed to the Order of the Day, on the petition of the Ex-General Sarrazin for the remission of his sentence for Bigamy.

On the Petition of *Sieur Delrue* for an increase of salary for his services connected with the Navy, being rejected—

M. L'ainé de Ville-L'Evêque observed that it was hard to see in the Department of the Marine such neglect for past services; he stated, that he knew that the widows of porters received pensions whilst those of the brave defenders of their Country languished in indigence.

The Minister of the Marine Department voted for the Order of the Day, because the Petitioner had not stated the truth in the reclamation before them. Here a warm debate took place, the left side of the House

LONDON, FEB. 14.

We have received this morning a series of *Madras Gazettes* to the 8th of Oct. last, from which we have made extracts of the most important articles of intelligence.

We regret to find in them, information of the death of Col. Bannermau, late Governor of Prince of Wales Island, which melancholy event took place on the 8th of August. His funeral was celebrated with marks of appropriate honour, and on the receipt of the news *Madras*, minute guns, corresponding with his age, (he was in his 61st year) were fired from the ramparts. The General Orders issued by the Government of Prince of Wales' Island, the day after his decease, speak of him in terms of unqualified eulogy and regret.—"He was one, it is observed, "whose zeal and anxiety to promote the public welfare were constant and unceasing, and whose useful and honourable labours, marked alike by integrity and every manly virtue, were not confined to the sphere of this Presidency, but have been exemplified, and often publicly appreciated, during a period of upwards of forty-three years, passed in the service of the Hon. East India Company, in various stations of difficulty, honour, and responsibility." The Hon. W. Ed. Phillips has succeeded to the Government of this Presidency.

A *Madras Government Gazette Extraordinary*, of the 11th Sept. proclaims that his Highness Prince Anzum Jah, etc. the eldest legitimate son of the late Nabob Azeem ul Dowlah Buhar, has succeeded to his father in the rank and title of Nabob Soubahdar of the Carnatic. These Papers confirm the accounts which have been received lately as to the disastrous condition of the Dutch, with respect to their recently restored colonies in the East. The last *schip Mail*, which arrived on Friday, contained an extract from the *Batavian Courant*, of the 31st July, stating that M. Muntinghe, the Commissioner at Palembang, had been forced to retire from that place, with the troops, to the island of Banca.

The *Penang Gazette* of the 17th July mentions, that the Dutch were driven from Palembang, with the loss of many men, not by the Chief who was set aside by the Netherlands Government, on the restoration of the Dutch possessions, but by the reinstated Sultan whom implicit dependence had been placed on. It may be remembered that while Java was under our dominion, Palembang was ceded to the Sultan to Great Britain, on the condition that he should be maintained on the throne, and supported in his dignity by the British Government. By a distinct and late article in the treaty of 1814, this island was also transferred to the King of the Netherlands, but on the conditions and subject to those compacts which had existed between the King of Great Britain and the Sultan. The first act, however, of the Dutch Commissioners who were sent from Java after the transfer of Palembang, was to depose the Sultan, whom he had protected, and seat another on the throne. It is this other who has driven the Dutch from his territories. The Dutch are said to have opened a battery of twelve pieces of cannon upon the Dutch soldiers who three times stormed their strong position in vain, and with the loss of 117 men and 10 officers, killed. Nor does it appear

that they have been allowed to remain in quiet possession of the island of Banca, to which they retired, after this defeat. In the *Supplement to the Madras Gazette*, of Oct. 6, it is stated that the news was confirmed of a revolt of the natives of Banca against them. There is every reason, to conclude, therefore, that the dominion of the Dutch in these possessions will not be easily established.

The following are further extracts:—

"*Madras*, Oct. 9.

"Advices have been received from Rangoon, by the *Britannia*, stating that the King of Ava died on the 6th of last June, and was succeeded on the same day by his grandson.

"*Mocha*.—Accounts from this place, brought by the Hon. Company's cruiser *Aurora*, confirm the former ones, of the whole coast being under the control of Ali Pacha. A rumour was prevalent at this place that the Russians had taken Constantinople. We can scarce credit this report, but we are told that a universal panic had seized the Turks in the Red Sea. Ali Pacha's ships were all dismantled and laid up at Judda. The commercial accounts from this place are satisfactory on the whole, though coffee continued high, yet Indian goods yielded large profits."

"*Bombay*.—Accounts from Scind state Rujpet Singh to have conquered Kashmir."

"*Madras*, Oct. 9.

"*Kutch*.—We are sorry to state, that there has been a dreadful hurricane, in the western part of this country. It lasted one day and two nights:—every tree has been torn up by the roots, and every kind of cultivation laid waste, towns and villages have been deluged and all perfectly destroyed. But few people have lost their lives;—cattle, however, of all descriptions, excepting buffaloes, have in many places been nearly extirpated; the water generally in the open country was running four feet deep, and carts in the fields were carried away many miles, by the force of the wind. The hurricane had not been felt at *Blouj* on the 29th of last month, but they had experienced eight days of high wind, rain, and such constant clouds, that the sun was a stranger to that capital. The rains, though not heavy, had yet been constant, since the 12th of July: not a seed of cotton had been sown up to the former date, whilst the grain crops had rotted."

Sept. 25.

"A frigate of 46 guns, for his Majesty's service, was floated out of the *Bombay Dock* on the 5th instant: she is named the *Seringapatani*, and is stated to be constructed on a theory calculated to combine the greatest stability with the least possible resistance to her sailing; and is considered altogether to be one of the most formidable ships of war, of her class, known."

"*Bombay*.—On Thursday morning his Majesty's sloop of war *Curlew*, Captain Walpole, from *Bushire*, the 2d September, and *Muscat* the 9th September, anchored in this harbour. By this vessel we understand, that letters have been received from Captain Sadler, of his Majesty's 47th Regt., who was some months since deputed by the Supreme Government to the camp of Ibrahim Pacha, commanding the Turkish troops, which had subdued the Wahabee power in Arabia, and occupied the tract of country bordering on the Persian Gulf: Captain Sadler landed at the port of Khatief, which he found in the possession of the Arab Shiekhs, on the 11th July, and after very considerable difficulties arrived at Ul Ahsa, under the escort of a Bedouin Shiekh, whose protection seemed of a very suspicious nature. Captain S. was to proceed forward on the 22d July, to join the Pacha's camp, which was said to be at the distance of ten or twelve days march from Ul Ahsa. The Pacha seems to be withdrawing the whole of his forces from the shores of the Persian Gulf, either finding himself not powerful enough to retain his conquests, or that their possession was not worth the expense. The whole of *Dayah*, lately a populous city, had been razed to the ground. The country through which Capt. S. passed is stated to be an entire desert, inhabited by the wildest race of Bedouins. Contests between the different tribes were frequently occurring, even in view of his tents, attended with much slaughter."

"The hot weather in the Persian Gulf is represented to have been much more intense than has been known for many years."

"The Imam of Muscat was blockading the port *Rassel Rhyma*; against which a considerable body of his troops had advanced by land."—(Courier.)

THE KING'S COURT.

On Saturday, at one o'clock, his Majesty held a Court at his Palace in Pall-mall, which was attended by the Archbishop of Canter-

bury, the Lord Chancellor, the First Lord of the Treasury, the Lord President of the Council, the Lord Privy Seal, the Chancellor of the Exchequer, the three Secretaries of State, the First Lord of the Admiralty, the Master-General of the Ordnance, the President of the Board of Control, the President of the Board of Trade, the Master of the Mint, Earl Mulgrave, the Lord Steward, and the Groom of the Stole.

The King held a privy Council, when he picked for the Sheriffs for England and Wales for the year ensuing.

Mr. Buller attended as Clerk of the Council. His Majesty gave audiences to the Lord Chancellor, the Earl of Liverpool, Viscount Sidmouth, and Viscount Castlereagh.

Lord Boston and Col. Whalley were the Lord and Groom in waiting.

The Court broke up about four o'clock.

A Privy Council was held on Saturday, at which his Majesty presided, for the purpose of determining the alteration in the Liturgy, which has been rendered necessary by the King's death. The nature of the alteration will be seen by referring to the *Gazette* of Saturday. It simply directs that in those parts of the Church service where "*their Royal Highnesses George Prince of Wales, the Princess of Wales, and all the Royal Family*," are prayed for, the words in Italics should henceforth be omitted.—*Courier*.

FUNERAL OF HIS LATE ROYAL HIGHNESS THE DUKE OF KENT.

We have already announced, that the body of his Royal Highness laid in state for a short time at Woolbrook Cottage, Sidmouth, previous to its final removal from a scene which, but a few days before, was distinguished by all the smiling joys of domestic bliss and social happiness. This took place on Sunday afternoon, in a spacious room, which was hung with black cloth, and lighted with thirty wax candles. The glare of day was altogether excluded. The coffin and urn were raised upon tressels, and covered with a rich velvet pall, turned up at each end to shew the splendid materials of which they were composed.

At the head of the coffin was raised a superb plume of feathers, and three smaller plumes were placed on each side; also right and left were three large wax tapers, in solid silver candlesticks, standing near five feet high.

The whole had a most awful and imposing effect, and the concourse of persons who were admitted to the solemn spectacle was immense for a country town. The company entered at one door, and having walked round the Royal remains, made their egress by another. Every thing was conducted with the greatest order and regularity.

On Monday the Procession towards Windsor commenced, attended by an immense concourse of spectators from the surrounding country, who sincerely lamented the early loss of one to whose future repose among them they had looked with the most pleasing sensations.

In every town through which the cavalcade passed, the utmost respect was evinced by the inhabitants; the shops were closed—the church bells tolled, and every other suitable attention was paid which the solemn occasion required.

On Friday the procession reached its appointed destination, Cumberland Lodge, which is situated in the Great Park, on the South side of Windsor, and arrived there at six o'clock in the evening. This lodge takes its name from the Duke of Cumberland, uncle to his late Majesty. It is a large substantial red brick building, not remarkable in the exterior for any architectural beauty, but the rooms within are spacious. It has for some time been unoccupied. The Prince Regent's Cottage (as of late it was called), so much the object of public attention some time back, is situated close to it, and was formerly the residence of the Deputy Ranger. On the arrival of the procession at the lodge, the coffin was received at the principal entrance by Mr. Mash, attended by Colonel Stevenson. It was conveyed into one of the suite of rooms on the ground floor, immediately at the left of the hall. These rooms were entirely hung with black cloth,

and tressels were prepared on which the body was deposited. Previous to the approach of the procession, a detachment of the Royal Horse Guards had reached the lodge in readiness to receive it. They were drawn up in front of the edifice, and after delivery of the corpse, they prepared to escort the carriage in which the urn was placed, to St. George's Chapel. For this purpose, each third man was provided with a flambeau; and soon after nine, the carriage, attended by the escort, advanced to the lodge. The night was pitch dark, and the weather unfavourable, consequently, few persons witnessed this part of the ceremony. The Dean was apprised of the approach of the urn, and had the Chapel lighted for its reception. At eight o'clock the cavalcade arrived, and was immediately advanced to the South door. The urn was then conveyed to the platform, leading to the vault, and in the presence of the Dean (the Rev. Mr. Digby), and of Mr. Mash, Colonel Stevenson, and the Officers of the Chapel, was lowered to the cemetery, where it was deposited in the niche in which the coffin was afterwards placed. The escort then departed to their quarters.

From twelve o'clock on Saturday morning until its ultimate removal in the evening, the body of his late Royal Highness lay in state, and was visited by many persons, who proceeded to the Lodge, notwithstanding the distance was upwards of three miles from Windsor. The spectators entered at the great hall, from whence they proceeded to the drawing-room, a spacious apartment, hung with black draperies, and lighted with wax tapers, fixed in silver sconces on the walls. The body was placed under a canopy, ornamented with escutcheons; and over the coffin, which was covered with crimson velvet, was a pall, also adorned with them. On each side of the body four large wax lights were burning, in massive silver candelsticks. At the head of the coffin sat two gentlemen of his late Royal Highness's household. The spectators passed round the coffin, and then retired. The effect of the whole scene was most impressive.

At seven o'clock in the evening, the bells of St. George's chapel and the parish church began to toll. A detachment of the Royal Horse Guards lined the streets from the gate of the Castle to the entrance of the Long Walk, in open order, every fourth man bearing a flambeau. At the same hour, the several departments of the procession, as it was to move from Cumberland Lodge, assembled on the lawn in front of that edifice, where they were marshalled in proper order, under the direction of Mr. Thomas, of the Lord Chamberlain's Office, Messrs. Bailey and Saunders, and their assistants, to whose zeal and activity much praise is due. Every thing being in readiness, the procession proceeded in the following order:—

A Detachment of the Royal Horse Guards, three abreast, bearing Torches.

Fourteen Trumpets and Drums of the Royal Household.

Kettle Drum, Mr. Richard A. Hiley.

Deputy Serjeant Trumpeter, John Nost, Esq.

Eight Knight-Marshal's Men.

Servants and Grooms of the Royal Family, in full state liveries, with erape hatbands and black gloves, four and four, bearing flambeaux.

Twenty Mutes on horseback, bearing flambeaux.

THE HEARSE.

Drawn by six horses, adorned with escutcheons of his late Royal Highness's arms.

A Mourning Coach, drawn by six horses, in which were the Comptroller of the Household, and Domestic Chaplain of his late Royal Highness.

A Mourning Coach, drawn by six horses,

the Majesty's Carriage, drawn by six bay horses, with Coachman, Grooms, and Footmen, in their splendid state liveries, blinds up.

His Royal Highness the Duke of York's carriage and six grey horses, with three footmen behind.

His Royal Highness the Duke of Sussex's carriage and six bay horses. Three footmen.

His Royal Highness the Duke of Gloucester's carriage and six bay horses. Three footmen.

His Royal Highness the Prince of Saxe Cobourg's carriage and six bay horses. Also with three footmen.

The rear was brought up by a detachment of Lancers, and the whole was flanked by the Royal Horse Guards, every fourth man bearing a flambeau. The streets of the town through which the cavalcade passed were lined with the Foot-Guards. The deep tone of the bells of St. George's Chapel and the Parish Church of Windsor announced its advance. This was the only sound which broke upon its silent way; there was no music whatever. This arrangement was stated to have been observed as a mark of respect towards the Royal remains yet uninterred. In this order the procession moved until it reached the place of its destination in Windsor-castle.

Such was the order in which this solemn procession moved, at a quarter before eight o'clock, from Cumberland Lodge to its final destination at Windsor. It was accompanied during its whole line of march by a number of spectators, both on foot and horseback, who were not deterred from indulging their curiosity by the general damp and gloominess of the evening. Indeed the darkness which was excessive, gave additional grandeur to the pomp and ceremony of the cavalcade, moving as it did amid the red murky glare of so many torches. As it proceeded down the Long-walk, a noble avenue of elms, nearly two miles in length, it formed a scene which to a spectator at the end of Park-street must have been highly imposing, not merely on account of the spectacle itself, but of the feelings and reflections to which it must have given birth. Tree appeared in dark succession to tree, as the torch-bearers advanced in their journey, until at length the whole outline of the avenue became distinctly visible; the general want of foliage which it exhibited, added an air of desolation to it, which was not ill suited to the melancholy procession which was passing through it. All was silent and solemn as the grave to which it was proceeding, except at intervals, when, in pauses of the wind, the slow tramp of horses, or the tolling of the funeral

bell, came upon the ear, and disturbed the surrounding stillness. On reaching the end of the Long-walk in Park-street, at nine o'clock, the procession was met by a large concourse of people, which, when joined to those who had before accompanied it, rendered the crowd immense; from whom, however, it met no interruption in its progress through the town. The windows of all the houses in Park-street, Castle-street, and indeed every place from which a glimpse of the passing scene could by possibility be taken, were filled with respectable persons of both sexes, clad in deep mourning; and at the Castle-inn and in other places wooden props were erected to prevent the balconies from sinking under the weight of spectators who were standing in them. That part of the Castle-yard through which the procession had to pass to reach St. George's Chapel was quite as crowded as the streets of Windsor.

Within St. George's Chapel a considerable number of persons had obtained admission to the north aisle and organ loft, from whence they could command a full view of the last sad offices which closed this affecting ceremonial. These visitors were admitted by tickets from the Lord Chamberlain before seven o'clock, at which time there was no more light in the chapel than what was afforded by a dozen tapers; this was just sufficient to prevent the chapel from being involved in utter darkness, at the same time that it flung an additional horror over all the funeral pomp within it. The whole of the choir, the altar, and the Knight's stalls, were lined with black cloth; and the *tout ensemble* had a sombre and gloomy appearance. A platform had been erected from the south door of the chapel up the centre aisle to the choir, and, to add solemnity to the scene, had been covered with black cloth. Upon this no light was cast whatsoever. The lights in the south aisle, also, were disposed in such a manner as to cast their radiance not into the body of the church, but into the windows of that side of it which was opposite the spectators. The effect thus produced was uncommonly grand, the windows were seen, and also the obscurity which covered every thing beyond them, whilst the white pillars of the chapel appeared conspicuous through the gloom, and gave the eye something on which it could rest with pleasure. About eight o'clock a detachment of the Coldstream Guards, now stationed at Windsor, marched into the chapel with two regimental flags hung with crape. They formed a single line on each side the nave, and shortly after their formation, received a large wax taper for every fourth man. On a private signal being given to their Officers, their tapers were almost simultaneously lighted, and the chapel, as it were by magic, was immediately filled by a glare of light, which was rendered doubly powerful, by the mist and darkness which preceded it. The fretted ceiling of the vaulted roof, with all its numerous architectural elegancies, became distinctly visible. Groups of persons continued to pace slowly up and down the aisles, until the deep tolling of St. George's bell announced that the procession was near at hand.

At eight o'clock their Royal Highnesses the Dukes of York, of Sussex, Clarence, and Gloucester, together with Prince Leopold, proceeded to the house of the Dean, where they put on their mourning robes; from thence they went into the chapter, where the procession within the sacred walls was arranged.

Upon the arrival of the procession at the Chapel, the drums and trumpets of the royal household, the Knight Marshal's men, and the servants and grooms of the Royal Family, filed off without the door.

At the south entrance of St. George's Chapel, the Dean and Canons, attended by the Choir, received the body, and the whole moved on in the following order:—

Supporters of the Pall, two Field-Marshal's, or Full Generals, in their uniforms, with black scarfs. Supporters of the Canopy, three Generals in their uniforms, with black erape scarfs.

The procession marched slowly up the centre aisle, every part of it was imposing and well arranged. choristers and lay-clerks were ranged two and two according to their stature; the two first appeared about ten years of age; these were followed by others a year or two older, and so on, till, by gradual succession, the eye rested on two individuals much above the level of ordinary men; after them followed others still smaller, and they again were followed by others still smaller, the series ended at pretty nearly the same degree of minute from which it had started. They were dressed in white surplices, and held small lighted wax tapers in their hands. They followed immediately after the ralds, and the contrast between the light simplicity of robes, and the heavy gorgeousness of those of the soldiers, was highly striking. The soldiers, in the mean time, order of their commander, Col. Cotton, had lowered their arms, and the regimental flags were lowered to ground.

No anthem played as the procession advanced to choir. It is a point of etiquette, that during the presence of a Monarch laying unentombed, the Church Service cannot be performed in any Cathedral or Collegiate Church. The mournful and unprecedented circumstance of this occasion the funeral rites which demanded the service were those of a Son of the Sovereign, moved at the same time to a happier state, and the solemn and affecting office of the dead peculiarly appropriate. The Duke of York, as chief mourner, sat at the head of the corpse, his supporters on either side, and the Dean of the canopy. The Rev. Dean then went through the ordinary service for the dead; the responses being given by the choir. During the performance of that part of the service, "Man that is born of woman," the Duke gradually lowered into the vault, by imperceptible machinery, and at the pronouncing of the words "earth, ashes to ashes, dust to dust," a small quantity of consecrated earth was dropped upon the lid of the great size of the coffin, there was some difficulty in getting it into the vault, the opening being not high enough for its admission. The closing of the coffin was then read, and the style and manner of the lamented Prince were proclaimed in the usual manner. proof of the general feeling. Marshal Oudinot, when attempting to speak on their introduction, was overpowered by his grief, and remained for some time in silent tears:—at length he uttered, in a subdued tone of voice—

SIRE,

The assassin's blow, which has penetrated the generous bosom of our most lamented Prince, has stabbed the hearts of all France.—On this mournful occasion, your Majesty's faithful National Guard anxiously presses round your Royal Person to offer the homage of their love and fidelity, and to assure your Majesty of their readiness to repress faction, and to defend the safety and honour of your Dynasty and Throne.

His Majesty thanked them in the most gracious manner, observing, that he had the most unqualified and unshaken confidence in their zeal, loyalty, and attachment.

The Deputation next waited on his Royal Highness Monsieur, but could not see him; the Marquis d'Antichamp, however, assured them, that his Royal Highness would appoint an early day to receive the expressions of their regret.

The Duchess of Berri, in the agony of her grief, caused her beautiful long hair to be cut off, observing, that she had now no longer a fond Lord and husband to admire it.

We have often had occasion to remark, with regret and disgust, the idle aberrations of such Gazetteers as the *Censeur*, the *Renommée*, and others, which too clearly proves a vindictive spirit, with haply (we beg the gentlemen's pardon) nothing of personal interest also. It is the duty of every honest and independent Editor, if he disapproves, to attack measures, not men, and not to deal round damnation "on each he deems his foe."

It is rumoured that M. Martainville is arrested.

The principal Theatres of the Metropolis will, it is said, be shut until the 25th.

The substance of M. Decaze's letter to the Procureur-General, respecting the article in the *Drapeau Blanc* of the 15th, is nearly as follows:

M. Le Procureur-General.—Hitherto I dispised the outrages and libels directed against me, but in the present case the interest of the community at large makes it a matter of necessity not to leave unpunished the calumnies of the *Sieur Martainville* contained in the inclosed number of the *Drapeau Blanc*. Cowardly accusations such as these are more insulting to the general feeling of national affliction, than they are personal to me; and it is in the name of the offended Community that I seek justice for this glaring offence.

La Renommée with its usual and appropriate loyalty, (at a moment when all France is in mourning and in tears) "regrets, what?" that, by a sudden period being put to the Carnival, the circulation of about 10,000,000 of francs was prevented." What a pity that the Editors and doers of the *Renommée* should not be allowed to dance! this is in deed throwing off the mask; they would do well however, to remember, that

"Words like these admit of no defence,
For want of decency is want of sense."

The monster *Louvet* still preserves the firmness and hardened deportment of an incredulous athiest, an unrelenting assassin, he talks coolly and familiarly with his guards, and recounts with disgusting indifference the transactions of the murderous day. Amongst other things, he stated, that he meant to stab the Prince when getting out of his carriage to go into the Opera House, but observed that his resolution failed him, adding that when he heard the footmen order the coach for eleven o'clock, he had for a moment given up his design because "it would keep him up too late"! However, after a turn or two in the Palais Royal, and taking something in a Coffee-house, he went back and perpetrated the dreadful crime. When it was remarked to him that his name would be chronic'd in letters of blood and covered by a nation's curses, he replied that Brutus who delivered his country, was no assassin. Such is this hardened vil-

lain, such the fruits of irreligious and revolutionary principles. It was said that he could neither read nor write, but the contrary has been proved, he has read but too much all the inflammatory writings of the day, and had actually taken notes of different disloyal and libellous Publications, Journals, and Pamphlets against the House of Bourbon, at least so the *Quotidienne* states. When a Clergyman poked to him of future punishment, he replied, "Why do you talk to me of God? I do not believe in him."

We insert the following sensible remarks of an intelligent Correspondent:—

"The dreadful misfortune that has lately shocked this Country could not so easily have happened in England; for though the English Monarch confides in the affection of his people; whenever the Royal Family go to the Theatre or elsewhere, a Bow-street Officer invariably attends dressed like any other individual, but with an alertness and sagacity beyond all other men; when any stranger lustrates about, he nevertakes his eye off of him, and is always at his heels; and thus some innocents have been prevented doing acts of mischief, which otherwise might have been perpetrated—our military too are resolute and vigilant; a fellow who should push an Officer on duty aside, would have been instantly felled to the ground—they keep so close to the royal person, that no unknown person can approach.

Just before the Duke of Berri stepped into his carriage to go to the Opera, he gave orders to pay an additional sum of 1,000 francs as a contribution to the poor of Paris: it may therefore be truly said of him—

"Blessed are they who sleep in the Lord, etc.
"For their works follow them."

It is said that the Duchess of Berri remarked that a sepulchral fatality attended the number 13:—since, on the 13th of July, 1817, her Royal Highness was delivered of a female infant, who survived but a short time; on the 13th of September, 1818, she miscarried; and on the 13th of February, 1820, her Husband was severed from her by the assassin's blade.

A Duel took place, the day before yesterday, between M. d'Ecquévilliers and M. Méchant, Chef de Bataillon, and formerly aide-de-camp to Marshal Massena. This officer spoke most indecently and unbecomingly on the late disastrous event of the Assassination of the Duke of Berri. They fought with pistols, and drew low for first fire; M. d'Ecquévilliers gained the first shot, and dropped his adversary dead at the spot.

A *Chapelle ardente*, (a Chapel highly illuminated night and day) is preparing for the body of the unfortunate Prince, who will be carried there this day, and lay in state for nine days, after which he will be interred in the Tomb of his ancestors at St. Denis.

The troops composing the Parade, since the death of the Duke of Berri, have worn a black crape on their arm; the Lancers wear a crape on their lance.

The painful task which of late has devolved upon us in consequence of the mournful events, which have occurred in the Royal Families of England and France, prevented us from paying that strict attention to the eventful state of Spain, which we otherwise should have done; the only additional information, however, which we have been able to obtain is what comes in the form of letters from Bayonne of the 8th instant, and from Cadiz on the 30th ult.; they concur in stating that Cadiz is invested, but not taken, that the Insurgents are fearfully increased, and that Antonio Guieda, the chief of the rebel force, has addressed proclamations to the inhabitants of Cadiz, their Country, and to the Bishop of Cadiz dictating to him not to misrepresent the duties of the people by inducing them to bend under the yoke of slavery and oppression; with many similar touches *à la Libérale*, these accounts are in direct contradiction of those which have stated Cadiz to have already fallen and rather strengthen the Government statements than otherwise; however we give

them such as they are, and thereby discharge our duty to our readers.

CHAMBER OF PEERS.

Sitting of the 17th inst.

At two o'clock the House met to take into its consideration the Project of the Law relative to the Liberty of the Press, and as more particularly connected with the Journals and other periodical prints. The order of the day required the discussion of the proposed law in an assembly of the whole House, but the House decided on its being previously referred to a Committee of Five Members, for a thorough examination.

The Chamber adjourned *sine die*, and will assemble again when the Committee is ready to report progress.

CHAMBER OF DEPUTIES.

Bulletin of the 16th Feb.

Printed copies of the project of the law relative to *la liberté individuelle*, with an exposé of the motives, were distributed to the members by the minister of foreign relations. Every one was curious to know who the members are who will form the committee to report upon this important subject. A committee of finance met, but all the other business of the house is suspended. The meeting of a secret committee on the suggestions of M. Manuel on the subject of Juries, and M. Constant's plan on the forms of ministerial Budgets, are indefinitely postponed.

LONDON, Feb. 17-18.

CEREMONIAL OF THE INTERMENT OF HIS LATE MAJESTY GEORGE III.

At the dawn of morning, yesterday, every road leading to Windsor presented a scene of hurry and bustle, unprecedented we believe any former time since it became the residence or burial-place of Kings. The succession of gentlemen's carriages, of post-chaises, gigs, and every species of vehicle, from the coach of the Peer to the most humble tax cart, as so rapid and ceaseless, that the eye strove vainly to catch a glimpse of the persons they contained. All the streets, on each side, every table and coach-yard were filled with horses and carriages. The eagerness to witness the solemn spectacle was such, that all seemed to travel with the rapidity of messengers, proceeding from one Court to another on the most important business. The shops in Windsor were closed, business was suspended, and solemn decorum was the order of the day.

Throughout the whole of Tuesday night, and up to the hour of admittance on Wednesday morning, the same state was observed, all persons in attendance being relieved every two hours. There was no cessation from labour during the night of Tuesday. The workmen were busily employed making the necessary preparations in the Royal Chapel, and along the covered way through which the procession was to move. A brigade of artillery as marched from Woolwich to Windsor, on Tuesday, with twelve 9-pounders. Twelve hundred of the Foot Guards marched from London on Monday to join the 500 previously quartered in the Castle, making 1700 of the royal Infantry. Long detachments of the two regiments of Life Guards arrived, on Monday, from town, to join the Royal Guards (Blue), who occupy the cavalry barracks at Windsor. According to military precedence at great royal ceremonies, the external duties were performed, and the outward approaches to the Palace were occupied by Foot Guards; while the household cavalry, Life Guards, considered more particularly attached to the Life, were dismounted and stationed in the interior; they lined the hall, staircases, the anti-rooms, during the lying in state, where they came in contact with the Gentlemen Pensioners, Women of the Guard, and the more immediate attendants on the Monarch. The orders for the household troops on this occasion, agreeably to etiquette, were received from the King, by Earl Cadogan, Colonel of the 1st Life Guards, being Gold Stick at Court.

On Monday evening His Royal Highness the Duke of York arrived at Windsor. By his direction some additional lights were hung in the Royal Chapel, and 3 chandeliers, more than usual, suspended from the ceiling over the choir.

The brigade of artillery was stationed in the long walk, about a mile from the gate in Park-street. At sunrise yesterday morning they commenced firing 5-minute guns, which continued throughout the day until sun set, when order was changed, and a gun was discharged every minute, until the Royal Body was deposited in the vault. Flashes of these guns continued through the evening to be seen over the tops of the houses for several seconds before their reports were heard, and contributed to the awful grandeur of the spectacle. The Royal Standard was hoisted on the Round Tower almost high.

The Lords in waiting, the Earl of Delaware and Lord Grey, continued to sit by the remains of their departed sovereign all night, each relieving the other in the mourning-dress at the end of every two hours. Col. Dance was Gold Stick in waiting. At a quarter before ten o'clock morning, the large candles by the side of the coffin, which had been burning all night, were removed, and fresh supplied. The smaller candles, which illuminated the apartment, were replaced. The State Attendants of the deceased then resumed their places, and Capt. Cipriani, in close attendance, ordered and superintended the necessary arrangements for the accommodation of the public. It was expected that the Duke of York, who, accompanied by Col. Stevenson, had visited the drawing-rooms would pass through the state apartments before the rooms were opened, and those admitted by special favour to the rooms were opened, were in consequence formed into lines in the King's Guard Chamber, so as to

leave a passage for his Royal Highness to pass. After waiting for some minutes it was announced by Mr. Mash, that the Royal Duke would not then visit the Audience Chamber, and Captain Cipriani having announced that all was ready within, and the Gentlemen Pensioners having taken their several stations as on the preceding day, the doors were ordered to be opened. The workmen in the Castle were among the first to gain admittance, after the visitors privately introduced had passed through the apartments. Some of these were in mourning, but the greater number were in their working dresses, and humble attire: the display of aprons, etc. did not operate to exclude any of them from taking a last sad view of the funeral honours of their good old King.

Precisely at ten o'clock, Queen Elizabeth's Gate was thrown open for the admittance of visitors. The whole of Castle-street, leading to this gate, was completely full. All were respectfully dressed, and their conduct in the highest degree decorous. No levity of remark, not a whisper unfit for the occasion. Every countenance was in mourning, and bespoke a state of feeling worthy of an English heart, naturally called forth by the death of the most virtuous of Sovereigns, who, for 60 years, governed, without even the imputation of crime, the greatest people upon earth. The most majestic pageant that ever passed to the Roman Capital, could not bespeak a nation's respect so highly and so emphatically, as the scene that presented itself yesterday.

Originally it had been intended to construct a platform across the Lawn from the outer gate, opposite the Queen's Lodge, to that entrance called Egerton's Gate. This was intended to be covered in, and it was proposed that those who were to follow in the procession should set down at the outer gate, and proceed on foot to that by which the public have been admitted to see the lying in state. Afterwards, a notice was given by the Mayor of Windsor, directing the carriages to proceed through the first gate, set down at Egerton's Gate, and return across the Green and again pass through the former. This arrangement, was deemed objectionable. It was feared that the outer gate would not afford sufficient room for carriages going and coming to pass each other without great risk of serious accident, and it was proposed again to revert to the first arrangement, dispensing with the platform and covered way.

Early in the forenoon workmen were employed in fixing strong posts across the upper Court-yard, on each side of the way, by which it was proposed that those who were to fall into the procession were to pass to and from the outer gate, and Egerton's gate. Five were placed on each side.

As the day advanced, the crowd that pressed for admittance at Egerton's Gate continued to increase. Many, appalled at the sight of the formidable mass which opposed their progress, gave up all idea of getting in, and at once retired. Of those who persevered some were seriously injured by the pressure of the crowd, and several were carried out in a state of insensibility.

The gate being opened, the tide of people moved on through the upper Court-yard, not with the hurried step of idle curiosity, but the solemn and steady pace of persons performing a melancholy duty. In a short time the crowds increased to an alarming degree, and the passage not being very wide, the pressure became almost intolerable. Screams were occasionally heard from women and children, and at length it became necessary to prevent, for a short time, the further admittance of visitors. At Egerton's Gate, near the staircase which conducts to Saint George's Hall, there was a solid mass of people extending to a considerable distance into the upper Court-yard. As they could advance from the last mentioned gate only two by two, their progress was of course slow. The crowd here, therefore, became greater than even at Queen Elizabeth's gate, and alarm began to appear in every countenance, in consequence of the cries and screams of those suffering under excessive pressure. Many ladies fainted, and it was frightful to hear the uproar among the Police Officers stationed between the two gates that no more should be admitted. We saw one boy brought away in a Gentleman's arms apparently lifeless; and such was the terror excited in consequence of those circumstances, that numbers, particularly females, who came from a considerable distance to view the ceremony of lying in state, departed without gratifying their curiosity.

Shortly after the public had been admitted to the rooms, the Coldstream Guards were allowed to see their late Monarch lying in state. They were marched through Egerton's Gate, by the way that was open to the public, and thence proceeded, with the least possible derangement of their ranks, through the suite of apartments appropriated to the solemn exhibition. Besides the soldiers of the Coldstream Regiment, most of the military in the neighbourhood, wearing their side arms, were permitted to view the lying in state. The great bell in the belfry of the Castle, and the bells of Windsor Church and Eton Chapel continued tolling, at intervals, through the day. In the course of the morning the Chapel was privately inspected by the Earl of Winchelsea and other persons of distinction. Till Tuesday it was not known that the Eton Scholars were to be admitted into the Chapel. More tickets were given away than would otherwise have been issued, and, in consequence, the bearers of them found it impossible to obtain the expected accommodation. The an-

xiety to obtain tickets, in the course of the day, became extreme, and fifty guineas were stated to have been offered, in more instances than one, for admission to the Chapel. The Organ Loft, which is capable of containing nearly four hundred persons, was appropriated to persons of the first distinction. The smaller erections which we yesterday noticed on each side of the altar were prepared for the reception of the Foreign Ministers who might attend. The Stalls on the right and left of the Choir were reserved for the Peers and Great Officers of State, to whom they are considered to belong.

A sermon was preached in the morning at Windsor Church by the Rev. Mr. Graham. The Mayor, and other Members of the Corporation, attended in their scarlet gowns, and the tribute rendered to the virtues of our departed Monarch was listened to with the deepest attention, mingled with the most affectionate regrets. The great Castle bell, and those of Eton and Windsor tolling at the same time, produced on the mind a religious, and mournful impression. The pulpit and organ were covered with deep mourning. A Royal escutcheon appeared in front of the pulpit. A platform, the same as that raised on the occasion of the Queen's funeral, was thrown up along the whole length of the nave of the Royal Chapel, and covered with black cloth. In the Choir a splendid canopy was erected over the spot where the body was let down. It was simple and beautiful in construction. The covering consisted of the richest mazarine velvet. On the top was placed a crown, and on each corner escutcheons in splendid embroidery.

At four o'clock the Duke of Wellington, accompanied by the Right Hon. W. Pole and Mr. Arbuthnot, arrived at the Castle Inn. They were soon afterwards followed by other distinguished personages, who were to take part in the approaching ceremony. The bustle created by these numerous arrivals was very great.

At six o'clock the gate of the Lower Court-yard, leading to the Chapel, was opened for the admission of such as were supplied with tickets of admission to view the procession. Guards were closely stationed along the streets, but particularly in that part where the crowd was expected to assemble for the purpose of presenting their card. We never witnessed, upon any occasion, such pressure, so much eagerness to proceed, and so much difficulty in the indulgence of the desire. Any thing that occurred in the course of the day at Queen Elizabeth's Gate, or the upper one, leading into the Mourning Chamber, was ease and indulgence, compared to what occurred here. The Ladies in particular underwent the most serious and distressing inconvenience.

Admission being obtained, a grand but dismal prospect presented itself in the Lower Castle-yard. There was hardly light enough to perceive the assembled crowds, who stood in close and silent order, along each side of the covered way, by which the procession was to pass. The Horse Guards were drawn up in that part of the railing next the covered way, and the inside was lined, right and left with Foot Guards, every fourth man bearing a link, not yet lighted.

At seven o'clock, the various persons who were to take part in the procession assembled in St. George's Hall, where they were marshalled in the proper order by Sir G. Naylor. From seven till a quarter before nine, His Royal Highness the Duke of York, attended by his Supporters, sat at the head of the corpse. At nine, the coffin was removed through the folding doors of the drawing-room, down the great staircase, to the vestibule, and placed upon the mechanical bier, used at the Queen's funeral.

The Chapel was decorated in a style of splendour unexampled on any previous occasion. There was a raised platform, which extended through the south aisle, up the nave to the choir. It was covered with black cloth; upon each side were ranged soldiers of the Foot Guards, every second man holding a wax light; behind these were stationed the Eton Scholars, to the number of 500 at least, all of whom were admitted by the special order of his present Majesty. In the North aisle seats, elevated above each other, were arranged for the accommodation of those persons who had received tickets of admission; those tickets were inadmissible after seven o'clock. The choir was also fitted up for the accommodation of persons of distinction, it was calculated to hold 64 persons.

The Chapel was hung with black, as well as the Knights' Stalls. The Gothic images only were left uncovered. The Altar also was hung with black, and near it were erected temporary seats for the Foreign Ministers and other strangers of distinction who attended the procession. Among the Ministers who observed the Duke de San Carlos, Count Liexen, Baron Insingaen, etc.

The Communion Table was covered with massive gold plate, from the Chapel Royal, London, as well as from the Chapel Royal, at Windsor.

Over the Royal Mausoleum was a Canopy of rich blue velvet; on the top was a Gold Crown upon a cushion; upon the border was a Gothic scroll, with festoons beneath, upon each of which the Royal Arms were emblazoned. The Canopy is not, we understand, to be removed for some time, and the Chapel is to remain in its present state for several days, in order to gratify the curiosity of the public.

in at the door of the South Aisle that showed the
of the pomp. The train moved down the Aisle, and
up the centre, through the files of soldiery to the
r. The printed order, which we have already given,
adhered to with little deviation, and when we recol-
that it was not decided upon till Monday evening, it
ects credit on the persons concerned in the dispositions,
ve carried them on with so little irregularity. The
ing of this great body of the representatives of all that
noble in the birth, intelligence, and public fame of the
m, took up nearly half an hour. And their order was
passed, that it was impossible to ascertain the majority
individuals. The Ministers walked according to their
k as Peers or Privy Counsellors. Lord Castlereagh
like amongst the eldest sons of Marquesses. Lord Cath-
was conspicuous in a superb uniform. We observed
d Sidmouth, Mr. Croker, Mr. Wellesley Pole. Im-
mediately before the coffin walked the Duke of Welling-
; the place of honour reserved for him whom the
d Monarch would have honoured among the first orna-
nts of his country and his throne. Behind the coffin,
ich was borne under a large black canopy, the Duke of
rk walked as Chief Mourner, covered with a long black
ok, riband, and with an immense silver star on the left
ulter. Next to him came the Dukes of Clarence and
essex; and after them the Duke of Gloucester and Prince
pold. The public attention was strongly directed upon
s excellent young Prince, but he seemed occupied with
duy that he was about to perform, and looked pale
d thoughtful. As the train entered the choir, the An-
em, by Croft, "I am the Resurrection and the Life,"
gan, and I was continued till all the stalls had been oc-
upied. The display was magnificent; the powerful light
ich threw all below into strong relief, reached but high
ough to touch the pendent helmets and banners into
our colouring, and the roof was a vision of burnished
ams and tissues among Gothic tracery. The vault was
l open, and the Royal coffin lay below, with the crowns
England and Hanover on cushions of purple, and the
oken wand crossing it. At the Altar, four Royal ban-
ers, covered with golden emblem, were strewn upon
ground, as if their office was done; the altar was piled
with consecrated gold plate, and the whole aspect of the
apel was the deepest and most magnificent display of
lancholy grandeur.

The procession commenced a little after nine, and the
vice was not concluded until half past eleven.
hus were committed to the grave, in all solemnity and
mour, with the high ceremonial of religion and of state,
mortal remains of the Most Sacred Majesty George
III. But though his body is given to the dust, his memory
laid not decay, while there is veneration in England for
val virtue. His Majesty, placed in an inferior rank of
world, would have been an honoured man;—for integrity,
plificence, and purity, he would have been the first No-
man in the Land. The Providence that placed him on
proudest throne of the world, destined him to preside
an age in which all earthly Sovereignty was to be
ed, to be yet preserved and restored by the Throne of
England, made strong by the affections of the people, and
sue affections won by the virtues of the Sovereign.
We have already described the numbers that flocked
to town to see the lying in state, in vehicles of every
type and value, and the disappointment which so univer-
sally prevailed among the new visitors at the utter priva-
cy of every accommodation, both of convenience and
betite, to which they were exposed by an almost general
lusion at Windsor from the inns, lodgings, and every
ce in which on ordinary occasions refreshments are to
had in abundance. All these places were previously
aged, and that too at a prohibitory price to the great
ss of the accumulated throng, by the principal persons
he different Public Departments, to whom were con-
ferred the superintendence of the Royal Funeral. For
rown accommodation, and that of their attendants,
y hotel and tavern had been previously engaged, and
ate lodgings were hired many days ago by families of
k in town, who had, from their connexions, access to
be ceremonies of the Court. The small inns, public
ces, etc. where usually accommodation may be ob-
tortably had at a cheap rate, were equally impervious
e pressing crowd. Any sum of money was in vain
ed for the most temporary assistance: but the answers
prohibitory—the rooms were all full. The military,
olice, and all those who were brought down to assist
e subordinate arrangements of the procession, filled
y corner which was covered in from the coldness of
weather. In vain were efforts made at Eton, and
12th, at one side of Windsor, and Frogmore and
het at the other, to endeavour to provide in those
the quarters that reception which was denied to them in the
pical town; but disappointment again met them in
the places, and if we could abruptly turn from the grave
he ludicrous, the scenes presented to the eye at the
ner of every street were peculiarly calculated, from the
nified appearance of such numbers in the throng, to
ate a transient feeling of merriment at the heterogeneous
ture which were to be found wandering, without any
pular destination, in every avenue leading to the

BRITISH PARLIAMENT.

HOUSE OF LORDS, FEB. 17.

This day, pursuant to adjournment, the
use met, and the Lord Chancellor took his
t on the Woolsack about a quarter past
ee o'clock. A number of Peers were then
orn, among whom were the Earl of De-
war, the Marquis of Bath, Earl Grosvenor,
e Marquis of Lansdown, the Marquis of
antly, the Duke of Beaufort, the Earls of
are, Beauchamp, Darnley, Ailesbury, Co-
ntry, Thanet, Dartmouth, Verulam, Garnar-
nry, and Derby, the Marquis of Cornwallis;
ords Hill, Somers, Auckland, Colvin, Rolle,
ley, Selsey, and King; the Bishops of Sa-
bury and Chichester, etc. The Dukes of
arence and Gloucester were also present.

Message from the King.

The Earl of Liverpool presented the follow-
g Message from his Majesty:—

"GEORGE R.

"The King is persuaded that the House of
Lords deeply participates in the grief and af-
fliction of his Majesty, for the loss which his
Majesty and the Nation have sustained by the
lamented death of the King his father.

"This melancholy event imposing upon his
Majesty the necessity of summoning, within a
limited period, a new Parliament, the King
has taken into consideration the present state
of public business, and is of opinion that it will
be, in all respects, most conducive to the public
interest and convenience to call the new Par-
liament without delay.

"The King, therefore, recommends to the
House of Lords to concur in such measures as
may be found indispensably necessary to pro-
vide for the exigencies of the public service
during the interval which must elapse be-
tween the termination of the present Session,
and the opening of a new Parliament.

"G. R."

The Message was read first by the Lord
Chancellor, and afterwards by the Clerk.

The Earl of Liverpool then rose, and stated
that it was his intention to propose that the
parts to the Message which were different in
their nature, should be separately considered.
Of that part which contained the recommenda-
tion of their Lordships he should propose the
consideration to-morrow. In that place he
was certain it would be their Lordships' de-
sire to keep the subjects distinct. With respect
to the first part there could be no difference
of opinion among their Lordships, and he
should, therefore, move an Address of Con-
dolence to his Majesty forthwith.

Address of Condolence.

The Earl of Liverpool.—In rising to propose
that a loyal Address should be voted by their
Lordships, to condole with his Majesty on the
loss he and the Country had sustained, he
knew he should rather be counteracting the
due expression of those feelings which their
Lordships, in common with all men, enter-
tained, if he were to enter into any details of
the grounds on which he expected them to
concur in such a vote. This, he was sensible,
was unnecessary, as the character and virtues
of his late Majesty were strongly engraved on
their minds and hearts. With regard to the
terms of the Address, it was his most anxious
wish so to propose it, that by sacrificing, if that
was necessary, every opinion of his own, he
might render it generally acceptable: but this
he felt assured was an occasion on which no
sentiment of party feeling whatever could
have any influence on their Lordships. They
would all be earnestly desirous of concurring
with him in the wish to perform his last duty
towards a Monarch, who had reigned during
60 years so happily over the country, who had
furnished so great an example to all those who
shall be his successors, and for whom all his
subjects entertained the deepest respect and
veneration. He also felt convinced that their
Lordships, in accompanying their sentiments
of condolence with expressions of their at-
tachment to his Majesty's person, must be
disposed, from past experience, to look with
confidence to the future. He felt convinced
that his Majesty's first wish would always be
the happiness and prosperity of his people.—
He had, therefore, no doubt that their Lord-
ships would unite with one voice in approv-
ing those sentiments in the Address, which
were, with respect to his Majesty, only the
expression of the feeling which he was confi-
dent would ever actuate his mind. It could
not be necessary for him to enlarge further
on these topics. He should, therefore, con-
clude by moving,

"That an humble Address be presented to
his Majesty, to express our deep and un-
guished sorrow at the death of the late King, whose
virtues had so justly endeared him to all
classes of his subjects.

"To assure his Majesty, that the many
blessings which we have enjoyed under his
Royal Father's mild and paternal Government,
can never be effaced from our minds; and that
we most gratefully acknowledge the signal ad-
vantages which the country has derived dur-
ing this long and eventful period from the aug-
mentation of all the great sources of our na-
tional prosperity, and from the splendid and

unparalleled achievements of his Majesty's fleets
and armies.

"That whilst we con'dole with his Majesty
on the loss which the Nation, in common
with his Majesty, has sustained, we beg leave
to offer to him our most sincere congratula-
tions upon his Accession to the Throne.

"To testify to his Majesty, our loyal and
affectionate attachment to his sacred person,
and to assure him that the experience of the
past, as well as our confidence in his character
and virtues, can leave us no doubt that his ef-
forts will be invariably directed to promote
the welfare of the country, and the happiness
of his subjects."

The Marquis of Lansdown was convinced
that there must be a most anxious desire in
their Lordships, on the present occasion, to
proceed in the manner which the Noble Earl
had pointed out. The deep sense which the
House entertained of the great virtues of his
late Majesty, left no doubt of their concu-
rence in the expressions of condolence con-
tained in the Address. It was his hope that
that good understanding which it was most
desirable should subsist between the Crown
and the Parliament would always continue; and
therefore their Lordships might be expected to
join in the confidence expressed by the Noble
Earl. For his part, he readily concurred in
the Address, because it went no farther than
the occasion required, and pledged the House
to nothing, but that to which all must be pre-
pared to agree. He assured the noble Earl,
that he approved of the separate consideration
of the parts of the Message in the way he pro-
posed. It was fit that part which (whether
Constitutional or not, he should not inquire,)
certainly was unprecedented, should be kept
distinct. In deference, however, to the occa-
sion, he would have abstained from saying one
word on that subject, had he not thought it
right to express his concurrence in the course
adopted by the Noble Earl.

The Marquis of Buckingham was sensible,
that if all the noble Lords who were anxious
to manifest their concurrence in the Address
should rise to express that disposition, it could
only be voted when all had delivered their
sentiments. If, however, he made any claim
to their indulgence while he expressed senti-
ments in which all their Lordships partici-
pated, he must confess that that claim was one of a
selfish nature; for those with whom he had the
honour to be connected, had been honoured
with great marks of royal favour by their late
lamented Sovereign. He hoped, therefore,
that he would be excused, if he took this op-
portunity of giving vent to the feelings of gra-
titude with which he was impressed. It had of-
ten been said, that the favours conferred by
Sovereigns were soon overlooked. This, how-
ever, had not been the case in the present in-
stance. Withdrawn, as his late Majesty had
been, by Providence, from his subjects, their
feelings of affection and gratitude had followed
him, and become stronger. He might have
expired amid all the glories of the late war,
rounded by the tears and the blessings of his
people; but though he had been long separa-
ted from them by a mysterious veil, their at-
tachment and loyalty remained undiminished.
That great Sovereign had, if the expression
might be allowed, forestalled the judgment of
posterity: but though he had been long ab-
sent from the world, such was the state of pub-
lic feeling, that it appeared as if his subjects
had only yesterday been deprived of his pater-
nal care. He concurred in all the sentiments
expressed to be addressed to his present Ma-
jesty. There was not a man in his dominions
who did not look back with feelings of gra-
titude to the illustrious example which had been
set by the late lamented Monarch.

The Earl of Darnley, after expressing his
concurrence in the Address, intimated his sur-
prise that no notice should have been taken of
the decease of an illustrious Duke: he ap-
proved of the separation of the subjects to which
the Message referred.

The Earl of Liverpool was glad the Noble
Lord had given him an opportunity of explain-
ing, that when he gave notice of his intention
to move the consideration of part of the Mes-
sage to-morrow, he omitted to state that he

would also move Addresses of Condolence on the death of the Duke of Kent.

The Address was then agreed to. The Earl of Liverpool then intimated, that as, in consequence of the indisposition of his majesty, it might not be convenient for him to receive the address on the throne, he would move that it be presented by the lords with the white staves.—Ordered.

The Earl of Liverpool then gave notice for to-morrow of an address of condolence to his majesty, and likewise to her Royal Highness the Duchess of Kent, on the death of his Royal Highness the Duke of Kent.—Adjourned.

HOUSE OF COMMONS.

The Speaker took the chair at half-past 3 o'clock, when between seventy and eighty members proceeded to take the oaths; among whom were noticed the following: Mr. Tierney, Lord Binning, Mr. B. Bathurst, Mr. J. Macdonald, Mr. Huskisson, Lord Stanley, Sir E. Knatchbull, Sir J. Graham, Sir W. Pringle, Lord J. Russell, Lord Thynne, Lord C. Somerset, Mr. Fazakerly, Lord Mount-Charles, Lord Clive, Mr. J. P. Grant, Lord Cecil, Lord G. Cavendish, Sir C. Atkinson, Mr. Ommamney, Mr. Ulysses Burgh, Mr. Hudson, Mr. Tomline, Mr. Lawson, Mr. L. White, Mr. J. Percival, Mr. Neville, Mr. R. Clive, Mr. G. H. Graham, Mr. Newman, Mr. W. Smith, Sir C. Forbes, Mr. D. Gilbert, Mr. R. Fitzgibbon, Mr. Phillips, Lord Morpeth, Lord Selkirk, Mr. Howard, Mr. York, Mr. Freemantle, Lord Pollington, Mr. C. Bathurst, and Mr. Fitzgerald.

Royal Message.

At a quarter to 5 o'clock, Lord Castlereagh appeared at the bar, with a message from his majesty. It was brought up and read, and was as follows—(See Lords.)

Lord Castlereagh said, he should move that it be taken into consideration to-morrow. He thought it necessary that Members should have a day to consider one part of it; but he hoped the House would feel that there ought to be no delay in replying to another part—he meant that which referred to the death of his late Majesty. The House, he trusted, would concur in offering an immediate Address of Condolence to his Majesty on that melancholy event, and also an Address of Congratulation on his Majesty's Accession to the Throne. His Lordship then resumed his seat, but after a pause of a moment, he again rose, and addressed the chair. In rising, for the purpose of moving that the House should offer to his majesty the most sincere condolence on that calamitous event, so sensibly felt by the whole nation, he was persuaded that it would not be necessary for him, and, indeed, that it would not be desirable that he should enter into any lengthened detail on the subject; still less that he should broach any topic calculated to prevent the unanimous expression of the sentiment which he was persuaded the whole House entertained of reverence and devotion to the illustrious individual whose loss was the subject of their lamentation—(hear, hear, hear.)—Whatever might be the opinions respecting the events of the late reign, and of the administration of Government under his present Majesty, there could, he was certain, be no difference as to this point, that, under the illustrious House of Brunswick, this country had enjoyed a greater share of happiness and glory than had fallen to the lot of any other nation on the face of the globe (hear, hear). The House, he was sure, were anxious to testify their deep affliction at the loss of a Monarch who, in the course of a long reign, and during periods of great trial, had, by his mild and amiable qualities, secured the love and esteem of the Nation. Indeed, the veneration in which our late beloved Monarch was held, and the general attachment to him by all ranks and classes, were visible at every period of his glorious reign, but more particularly on those melancholy occasions when he was prevented from superintending in person the interests of his people. In the unusually long period of his reign, the country had grown up to rank, power, and commercial splendour, unequalled among the nations of the earth. With these feelings as to the character of the late reign, there would not, he was certain, be any differences as to the Address of Condolence which he meant to propose. With respect to the other topic of the Address which he should have to move, he was as firmly persuaded, that, in congratulating his Majesty on his Accession to the Crown, the House could not hesitate to augur happily of the future, from all that had already occurred.

Whatever differences of opinion might exist as to particular measures, either adopted in his Majesty's Councils during the period of the Regency, or proposed to Parliament,—he was sure that the general feeling of the country would go along with the gracious declaration made by his Majesty on his Accession;—and that the experience of the past would satisfy all classes of the people, that it would ever be his Majesty's most anxious endeavour to promote their prosperity and happiness, and to maintain unimpaired the religion, laws, and liberties of the kingdom (hear, hear). His Majesty had made the example of his Royal Father the basis of his conduct; and he (Lord Castlereagh) was convinced, that if his late Majesty could have been aware of that which had been done in his name, it would have met with his unqualified approbation. On the past, the seal was set: it had become matter of history. In the future, he was convinced the wise and beneficent spirit would be evinced by which the illustrious Family of Brunswick had invariably been distinguished. He trusted that his Majesty's reign would be long and happy. As far as his Majesty had already presided over the Councils of the Country, the result had been glorious. He trusted, and was persuaded, that his Majesty would have the gratification of adding a new page of lustre to the English history; and that as there was nothing of glory left to achieve, his Majesty would snatch the only remaining laurel, by cultivating the Arts of peace, and by pursuing a course marked by policy, justice, and moderation.—The Noble Lord concluded by moving,

“That an humble Address be presented to his Majesty by this House, to convey to his Majesty their expression of deep affliction on the lamented death of the late King—a Monarch whose virtues had so long afforded the brightest example to, and who had so long reigned in the hearts of, his people; to assure his Majesty that they would never cease to cherish the recollection of the many blessings which the country had enjoyed under the mild and paternal government of his Royal Father, during his long and eventful reign—a reign in which such advances had been made in Arts and Industry, in Commercial opulence and National power, and in which the country had derived so large an accession of glory, from the splendid achievements of his fleets and armies; to add to these expressions of deep regret and condolence on the late calamitous event, their most sincere congratulations on his Majesty's Accession to the Throne of his ancestors; to convey their most dutiful assurances of loyalty and affectionate attachment to his most sacred person, and to entreat his Majesty to believe, that from the experience of the past, as well as from their confidence in his character and virtues, the firm conviction of the House that his reign would be marked by constant endeavours to promote the general prosperity and happiness of his People.”

Mr. Tierney said, he should be as forward as any man to extol the virtues of his late Majesty—virtues too numerous to be repeated; but in doing this, he would mix nothing of political feeling—(hear, hear). He was also ready to concur with the Noble Lord in congratulating his present Majesty on his Accession to the Throne.—No individual had a more sincere respect for his Majesty than he had, and he sincerely hoped that his reign might be long, and such as would do honour to himself, and bring lasting benefits to the country. There was one part of the Noble Lord's speech, and also of the Address, which he thought might better have been let alone. He alluded to the expression—“from the experience of the past.” He wished to bury all the past in oblivion. He would turn his back upon it, and only look forward to a new reign. That, he trusted, would be such as to reflect credit on the Sovereign, and be of advantage to his people. He again hoped it might be a long and happy one, and that his Majesty's Ministers would be worthy of the confidence of the Nation.

The Address was then put, and carried unanimously; and it was, on the motion of Lord Castlereagh, ordered, that in consideration of his Majesty's illness, the Address be presented by such Members of the House as were of his Majesty's most honourable Privy Council.

THE LATE DUKE OF KENT.

Lord Castlereagh now moved, that an Address of Condolence be presented to his Majesty on the lamented and premature death of his illustrious brother, the late Duke of Kent.

The question was put, and carried unanimously, and ordered to be presented in the same manner as the former.

On the motion of Lord Castlereagh it was agreed to, that the Duchess of Kent, on the lamented death of her Royal Consort.

This Resolution was ordered to be communicated to her Royal Highness.

Lord Castlereagh then moved, that the Message of his Majesty be taken into consideration to-morrow; at which time he would state to the House the nature of the course which was intended to be proposed.

Mr. Tierney—Will not the Noble Lord give us some general idea of the intended course at present?

Lord Castlereagh.—If I were to enter partially upon the subject now, it would tend more to mislead than to enlighten Members.

Mr. Tierney.—But surely the Noble Lord may inform us generally whether he intends to propose this measure or that? If he does so, I shall not make a single observation upon it at present.

Lord Castlereagh.—The House may rest assured that no measures but such as are indispensable will be proposed, and those only in order that the public service may not be injured in the short interval which shall elapse before the ensuing Parliament.

Mr. Tierney.—We are still as far from the nature of the intended measures as before. The Noble Lord talks of indispensable measures; but many measures are indispensable. There is the Mutiny Bill, the Civil List, and some other measures, which are indispensable; but

cannot the Noble Lord say what other indispensable measures he has in contemplation?

Lord Castlereagh.—The House will understand what those measures are.

Mr. Tierney.—I do not think the House does understand them, and I believe nobody does, from anything which has now been said. Here the conversation dropped.

CORRUPT BOROUGH.

Lord J. Russell rose to say a word or two, which he wished to stand as a notice of a Motion of his for to-morrow. He would then move that the Speaker do not issue his Writ for the Election of Members for those Boroughs which were lately the subject of Parliamentary inquiry (Grampound and Penryn) until some further measures should be taken with respect to them. If the Message which the House had just heard had not been brought down, he would have given notice of a motion for leave to bring in a Bill to disfranchise one of the Boroughs, and to transfer the right of voting to some other place—a measure which he was yet uncertain whether he should not follow up; for the present, however, he would content himself with the notice for to-morrow.

The motion that the Message be taken into consideration to-morrow was put, and agreed to; and after some routine business, the House Adjourned.

PARIS, FEBRUARY 22, 1820.

Tros Tyriusque mihi nullo discrimine agetur.—VIRGIL

Yesterday, after Mass, which the King heard in his apartment, His Majesty gave audience to a great number of Generals, who were accompanied by the Minister of War.

The Minister of the Marine yesterday transacted business with his Majesty.

The day before yesterday their Royal Highnesses the Duke and Duchess of Angoulême passed most part of the day with the Duchess of Berri.

By a Royal Ordinance, bearing date the 20th instant, the King has promoted the Comte de Cazes to the rank and title of a Duke, with reversion to his heirs male, as is usual in such cases. His Majesty has also appointed his Ambassador to the Court of St. James's.

By another Ordinance, of the same day, his Majesty accepts of his resignation as Prime Minister and Minister of the Interior, motivated on the state of his health's unfitting him for the fatigue of office; the honours conferred on him are stated by his Majesty to be in return for his faithful services, and devoted attachment to the royal person, under arduous and trying circumstances.

By a third Ordinance, of similar date, Duke de Richelieu is appointed Secretary of State, and President of the Council of Ministers.

Loyal addresses to the King are pouring daily from all parts of the Country, expressive of deep affliction at the late melancholy and full of loyalty and attachment to his Majesty's person and Dynasty.

Every where the army is indignant at the act of an assassin, who has, as far as was guilty power, stained the name of a King, but he is no man but a monster.

The following is the substance of the Speech of the Marshals of France to his Majesty a few days since:—

SIRE,—We, the Marshals of France, a body to express to your Majesty our grief in consequence of the atrocious which has just deprived your Majesty of a Prince, who was one of its dearest. All France is in mourning, and we, Sire, that there is not a soldier in your whose heart is not rent with anguish at the last drop of his blood in the defence of your Throne. We intreat your Majesty to accept of the renewal of our oath of to your Royal Person and Dynasty, and most devoted attachment.

Longchamp

"In the Bois de Boulogne an annual promenade or procession of Longchamp takes place on the Wednesday, Thursday and Friday of Holy Week. -

Longchamp was formerly an Abbey or Convent, situated near the Bois de Boulogne on the right bank of the Seine, in the first bend formed by that river on its leaving Paris. It was founded by Isabella, sister of St. Louis, who died there in 1269. Saint Louis, who was very fond of his sister, attended her funeral. She was first buried in the Cloister according to the custom of those times; but many miracles being said to be performed at her tomb, her body was taken up and transported into the Church.

Two other French princesses died here, in this Convent - Blanche, daughter of Philippe

le long, and Jeanne de Navarre — As this Convent was celebrated for the Vocal Music of its Church, it had become a custom, before the Revolution to go there to Vespers, and particularly the office called Tenebrae in Holy Week, of which the music is very fine.

This custom, by degrees degenerated into a fashionable drive & promenade.

Here is displayed every year all the finery, luxury, elegance & coquetry of Paris.

On the spot where the Abbey of Longchamp stood is a ferry across the Seine.

and walked on the terrace, which though very fine, the scenery is not near so fine & grand as at Meudon - indeed I know no spot so good, beautiful & romantic as the latter, added to which it is tranquility itself - the fore-ground

at Bellevue is certainly very fine, with the advantage of the river, but there is a wearisome stretch of it beyond, which soon loses the effect it at first produces. — This Chateau is almost in Ruins. — but is capable of being easily restored to its former splendour, which some times or other, when it falls into different hands, I have no doubt will be the case — at present it belongs to an individual of no note, who is only waiting the opportunity of a good offer. — I am told the Duke of Orleans has bid large for it, but not equal to the avaricious demand of the proprietor —

It was built by Louis 15th for Madame Pompadour. — it is most highly embellished & is said to have been finished under her directions — it was built in 200 years —

Leaving this charming spot, & rendered still more so by the beauty of the day, we drove by the Manufactory at Sèvres & through the park of St. Cloud Home — Mr. Beau rode with me — & the whole party were delighted with one of the most beautiful & romantic rides that can be

Morning dull & foggy — cleared after breakfast.
Drove & visited Lady Williamson & Miss Swift
at 9. — Then to Stephens, — Mr & Mrs S.
accompanied me to

The Races in the Champ de Mars
at Paris — it was very fine at the
way then, but soon afterwards became
dull, & first a drizzling then a heavy
rain came on. — so as entirely to spoil
the pleasure of the day. —

The princes were expected, but the
weather prevented their coming, — we
took our places near the stands, but

it is not a good situation - the opposite side is much better, because you can see the play made on coming in. - Only two horses ran at a time. Sale appeared to be rode by English riders. - there were four races. - returned home immediately afterwards. - rained then only at times - put Mr. & Mrs. Stephens down at their own house & got home to dinner at 5¹/₂. -

The Town is illuminated to night, but after being somewhat wet, did not go out to see it. -

10 Octobre 2.

Morning dull. - & c. d. - Came on to rain - Mr. Frater came - Lady Williamson called in a heavy rain. - Mr. Colclough called. - did not go out till the Evening - Walked to Mr. Dunn met the Stephens's there, and the Miss Bevers walked with me to Mr. Wallers where we were engaged to Tea. - met Admiral Lincolns & Mrs. there, Mr. Howard &c. - Eight fine horses at 1.

from thence to Paris by Sevre. to see the
Fête on occasion of the birth of
The Duc de Bordeaux. the infant
son of the Duchesse de Berri. -

At Sevre they would not let us pass
either of the Bridges - we went therefore
by the Marshes to the Barrière des Invalides
& by the port Royal - that of Louis XVI.
was preparing for the Fire works. -
put my horse up in Rue Vert, & called
at Schirfens, who I find has changed his
change his lodgings to N° 20 Rue Duphot.
Had not time to go there - we went direct
to the Champ de Mars to see the distribution
of wine & small bread &c - & the numer-
ous games exhibited there, - Madame Sacchi
also ascended a high tree by the tight rope.
- Dined badly at the Restaurateurs, near
the house occupied by the Duke of Wellington.
- afterwards went to the Tuileries Gardens

and English pastry Cooks in Rue Rivoli till the illumination began. — those of the Gard. D. Corps & Chamber of deputies & the Admiralty (Gard. trunks) were the most conspicuous & a superb star of the Order at the palace of the Legion of honour. —

The fire works were on the Port Louis Seize and very beautiful & brilliant they were. —

We got a good view of them from the West terrace of the Garden of the Thuilleries — & by hiring chairs at 15 sous each to stand upon, our view was still better. — They went off at 8. & did not last long.

The crowd was immense — but as usual neither noisy or crowding. —

Took a turn through the Champ Mars in our way to the stables — the amusements except the dancing & some Theatres were over at 9. —

Off by 2 past. Home by 11². — very fine night & mild. —

462 Murder of their Father - their names Gateroy - the
crime was committed seven or eight years ago -
I discovered only lately by some words falling from
themselves, in the heat of a quarrel between them -

They walked barefoot before a Cart to the place of
Execution with a white sort of surplice & their heads
entirely covered with a ^{black} crape - they both mounted the
Scaffold & set upon one of the baskets placed there, & spent
a short time with the priests, each having one -

The priests soon descended the stairs, as did one of
the culprits, leaving the one first to be executed. I

The Execution.

The Crape & surplice being taken off - the neck
& shoulders appeared bare, ready for the knife.

The right hand was put upon a block convenient
fixed in the platform and even with the elbow -
this block has an Iron which by turning a wheel
fixes the arm firmly & the fingers project over the
edge of the block & clasp it. - Thus 

One of the
The Executioners now seized the hand with one stroke
of the hatchet & the Culprit is immediately bent forward
on the board which is shown under the Guillotine, the
knife is let fall, and the body is immediately rolled
into the long basket, placed ready to receive it,
the head falling into one placed also in front of
the machine - it is quickly taken out & thrown with
the body - The other brother now ascended the

1820

Decembre 12. platform & underwent the same operation. 463
tion. - the basket containing the bodies is
shove into the Cart - the bloody sawdust is
swept up - and the machine is then taken
to pieces. -

It appears the Father was a very dis-
soluble man & was squandering his little pro-
perty very fast - when these hopeless youths
arrested his progress by cutting his throat
in a wood & having the Major by him, so
that he sought appear to have done it him-
self - but fearing they had not sufficiently
completed his destruction, they returned to
the body and inflicted several stabs upon
it so as to leave no chance of his recovering.
but a tolerably certain one of detection - as it
afterwards turned out. -

Major & Kew fainter at the latter part of
the Execution & I went with him & the Rev.
Mr. Bever into a Cabaret close by. - there
was a misting rain the whole time & I
returned home with one coat not much
improved from the exhibition. -

Pursed myself the remainder of the day.
- My chest is a good deal affected. -
